SOLPUNK

Åkildevej 10, 5762 Vester Skerninge

26 - 31 AUG 2022

~~SIGN UP
HERE~~

A green circular sign with a white border and a red 'X' over it. A white hand cursor with red outlines is pointing at the sign from the bottom left.

WHAT IS SOLPUNK22?

Solpunk22 is a gathering for anyone interested in creating anything solarpunk with others! Living document [here](#).

Well, what does that actually mean? Is it an un-conference, is it a festival, is it just some punks in a field? We don't know yet, but a wise guess is that punks here are interested in many of the following things:

Lowtech and community tech, Energy reduction and renewables, sharing resources, temporary nomadic community, dancing, alternative economy, creating a just future, hackathons, dumpster diving, opensource hardware, software and production, means of care and solidarity, community

There was a Solpunk gathering last year, held at the grounds of the Myselium Collective, with workshops about solar panels, scuttlebutt/fediverse, edible wild plants, contact dancing, utopian thinking, dumpster diving, psychedelics, planetary meditations, local alternative history, starlight rave dancing and more and all the connections and meetings happening in between it all.

**A GREAT OPPORTUNITY TO
LEARN, EXPERIENCE AND SHARE.
SO BRING YOUR PROJECTS,
MAKE A WORKSHOP!**

WHO ARE WE?

WHO AND HOW - ARE - WE?

WE ARE A GROUP DOING THIS TOGETHER, AND WE WANT TO LEARN HOW TO DO THINGS TOGETHER. IF YOU WANT TO TAG ALONG, YOU ARE IN THE GROUP. WE ARE WE.

SOLPUNK22 OPERATES ACCORDING TO THE FOLLOWING PRINCIPLES:

- **Leave Better Trace: give back to the space we're in and clean up after ourselves**
- **Self-organized: organized in a distributed fashion with a flat structure**
- **Collective funding: We sign up what we're doing and crowdsource the costs at the end of the festival.**
- **Care for the people**
- **Care for the future**
- **Share knowledge**

THE AIM IS TO HAVE 60 ATTENDEES, WITH A CAP OF 100.

TO ENABLE THIS, WE NEED:

- Electricity
- Hopefully we'll be able to use a solar setup again. Or else, we might need to think different or go stonepunk :)
- Water
- Like last year it will be possible to gather fresh water in tanks.
- Toilets
- A kitchen
- Like last year, the plan is to setup an outdoor off grid kitchen.
- Sleeping areas
- Bring a tent or a tarp. Bring two if you can. If the weather is really bad, there might be a rough indoor area. Think of a dusty barn.
- Dry areas
- It might also be a possibility to move activities and workshop indoor, if the weather is bad or it's needed.
- Tech stuff: Bring your gear if you want to join the decentral interwebz someone will build, or learn about new radical software or just hack away.
