# Advanced Inventory Management

## Hit On-Time Delivery Goals by Transforming Your Supply Chain

**On-time delivery starts in your supply chain.** LeanDNA empowers your teams to focus on the daily actions that matter most to optimize inventory, avoid shortages, and improve supplier relationships. Our cloud-based, prescriptive analytics platform automates daily reporting, goes beyond big data to drive action and collaboration, and provides visibility into inventory opportunities across buyers and sites. We get you up and running quickly, with seamless integration with any ERP system or across multiple ERP systems. Supply chain transformation starts here.

> We had some sites whose on-time delivery percentages were in the 70s and 80s. With LeanDNA, we've been able to improve those numbers into the 90s across all sites.
>
> —*Scott Spencer, VP of Supply Chain, Safran-Zodiac*

## Prevent Shortages

Automate shortage reporting and prioritization

Discover root causes

Manage supplier commitments

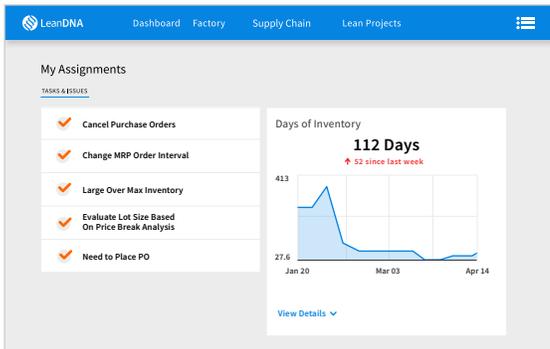

## Optimize Inventory

Get daily prioritized action recommendations

Track trends across sites and ERP systems
