

Tesla Demo App for Powerwall

Tesla has launched its demo app for Certified Installers to demonstrate how a customer can seamlessly monitor and manage Powerwall and solar panels from a single location.

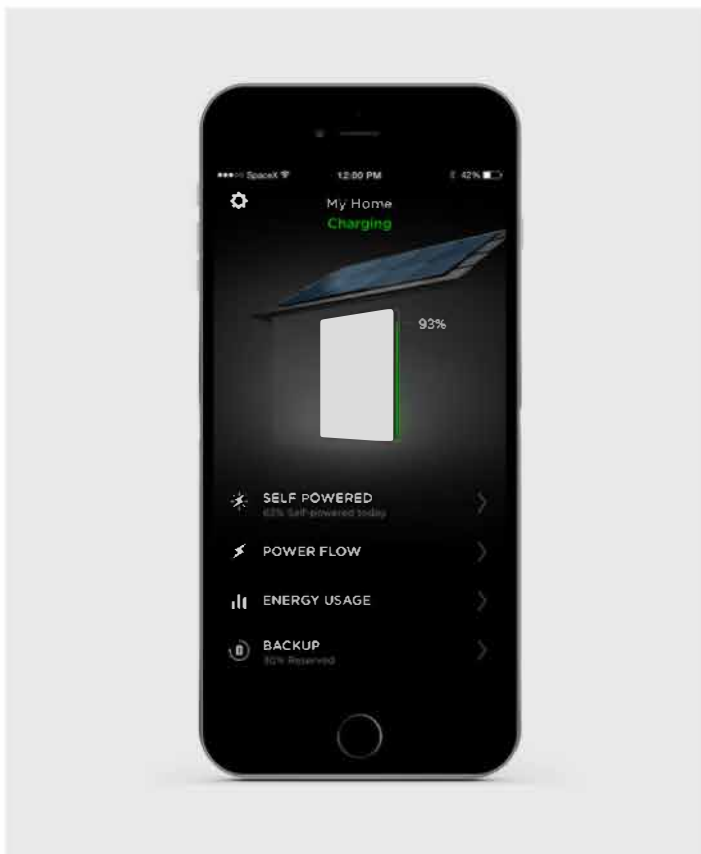

Powerwall owners can use the app to track energy generation, monitor energy usage, receive notifications of power outages and more

Access the Tesla Demo App by following these simple steps:

1. Download from the App Store or Google Play
2. Find the Tesla 'T' icon on the home screen and open
3. Login using the following details:

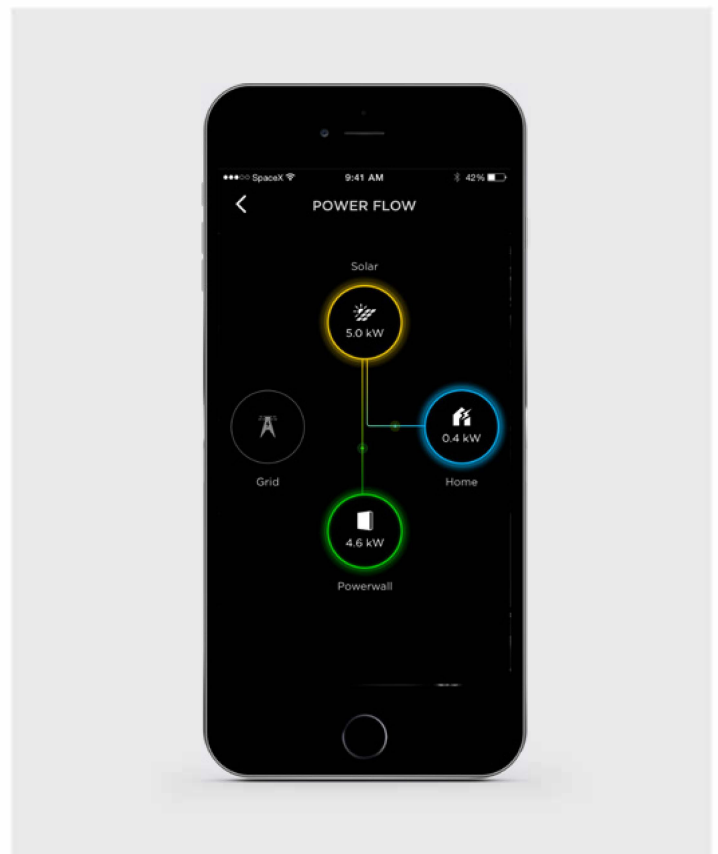

Email: GoPowerwall@tesla.com

Password: GoPowerwall123

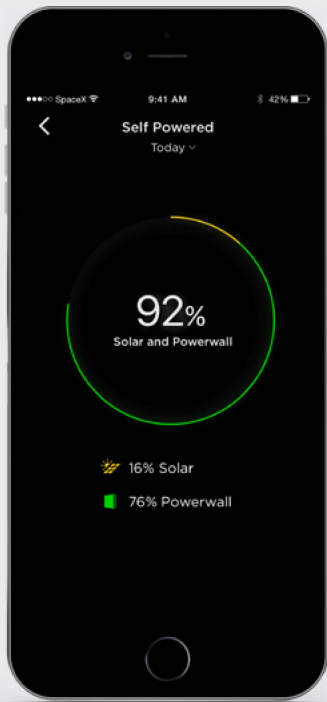

Energy Reserve

Navigate between Powerwall features, monitor its energy reserve and receive notifications when it switches to Back-up Mode.

Power Flow

Monitor your solar, Powerwall and home energy use in real time, and receive notifications about utility power outages.

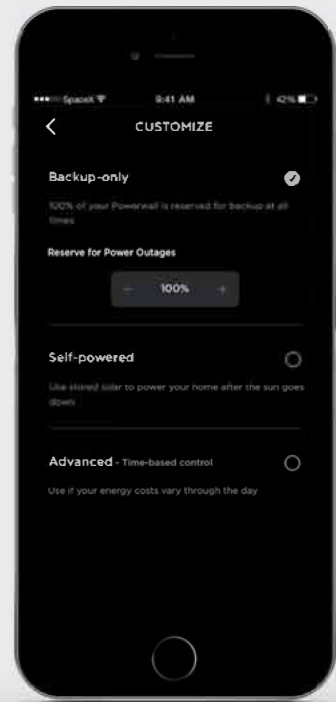

Performance

View a live graph of your daily, weekly, monthly or annual energy generation.

Backup History

View a real time record of Powerwall's recent backup history.

Customise Operating Mode

Customise all standard and special operating modes available with Powerwall.

The customer will receive their Tesla Account login upon ordering and their Powerwall will appear directly after installation.
