

Conservation of Amphibians & Reptiles is pleased to host:

Run-of-River Hydro Projects & the Coastal Tailed Frog

Rylee Murray
3:00 – 4:00 pm
Library Workshop

Rylee Murray is a PhD student from Simon Fraser University. He has been conducting amphibian and freshwater ecological research since 2010, collaborating with government and independent scientists, university researchers, NGOs, private contractors, and First Nations. Ongoing projects include predicting the spread of a non-native amphibian for conservation prioritization of native amphibian populations, and the ramifications of developing river diversion hydropower (aka Run-of-River) in coastal watersheds.
