

# SGV

First introduced to the Japanese market in the mid 1960's, the SGV became a hit with early rock bands due to its unique tone and then contemporary styling. The new "Blue Jeans" SGV model is a fresh rendition of that nostalgic guitar with refinements that bring up to date. Both the SGV800 and SGV300 use bodies crafted from alder with bolt-on rosewood or maple necks. They also feature an original tremolo system designed by Yamaha that incorporates sealed ball bearings at the fulcrum. This original design creates a tremolo system with ultra smooth and fluid action. The SGV800's electronics include Alnico single-coil pickups made to our original specifications, controlled by a 3-position selector switch, separate front and rear volume controls and a master tone pot. The SGV300 uses single coil pickups, a 3-position selector, volume, tone and pickup balance controls.

## The Smoothest Tremolo Ever!

Looking to improve on our tremolo system design, our craftsmen incorporated sealed ball bearings mounted in the tremolo unit's base plate. This totally unique design provided uninhibited rotation of the tremolo at its fulcrum. The result is a tremolo that operates smoother than all previous tremolo systems giving the SGV the smoothest tremolo ever.

• **Pickups (SGV800)**

Uniquely shaped pickup covers conceal a pair of Alnico V pickups that have been specially designed by our staff. The single coil design of this pickup system delivers nothing less than superb tone.

• **Sperzel Locking Pegs (SGV800)**  
Sperzel tuning pegs offer trouble free precision tuning that keeps strings in tune once pitch is attained.
