Built to safeguard every critical mobile communication. Wire's security is recognized by IDC as unique.

German Government Use Case

With a large number of government workers operating from their home office, protecting sensitive communications outside of the IT firewalls grew critical.

The German government uses Wire's secure communication platform to facilitate working from anywhere while drastically reducing security risks. The Federal Office for Security in Information Technology (*Bundesamt für Sicherheit in der Informationstechnik* or *BSI*) issued a release recommendation for Wire's secure solution making it an official tool for handling classified information.

Offering audio and video conferencing, messaging, screen-sharing, and file-sharing, Wire's is also well-appreciated by users, meeting their collaboration needs in a modern and intuitive platform.

Best-in-class Security

- ✓ NSA and BSI Recommended
- ✓ Perfect Forward/Backward Secrecy
- ✓ Mission-first System
- ✓ Minimal Metadata Footprint
- ✓ Developed by former Skype Technologists

Feature-rich

- ✓ Full Collaboration Suite
