# Flash '3G Polish' (gel polish)

## NEW! SENS FLASH '3G POLISH' (GEL POLISH)

The Flash product range seduces with new wild, summer shades: coral, pink turquoise.

The most vibrant neon shades are available with reflective glitter, while still having an intense effect in bright light. In normal light conditions, it may "just" look like an extremely tight-covering, low-gloss gel polish but if the nail doesn't get direct light but is lit from the side or back, or if it is illuminated in a darker environment, almost every glitter separately will glow dazzlingly! It creates a granite effect when the material is matted! Dense, high-pigmented, soluble 3 Step CrystalLacs that cover perfectly in one coat. You can get an extremely special effect that will attract all eyes! Curing Time: 2-3 minutes in UV, 1-2 minutes in LED.

4ml

"I love the shades of Flash '3G Polish' (gel polish) because they shine incredibly strongly, reflected on my nails."

**Barbara Újvári**  
SENS by Crystal Nails ambassador

SENS NOVELTIES!

# Cuticle Serum

## NEW! SENS CUTICLE SERUM

End the treatment with a real 24K gold leaf! Already in economical 30 ml edition!

Skincare serum with 24-carat gold flakes, royal jelly, and silk amino acids for the proper care. The ingredients naturally provide intense, deep hydration and help increase skin elasticity, tighten and smooth the skin of the hands. Slightly fruity scent.

A big advantage is that it is not oil-based, so it cares for the skin without leaving a shiny mark on it. After using it, the nail bed will be full and soft, which can be photographed immediately, you don't have to bother to remove traces of oil, which would degrade the aesthetic and professional value of the work. This novelty will be the decoration of any salon with its elegant, luxurious radiant look.

NEW TOP GELS

# Cool Top Gel Universal New Formula

## Sens Matte Top Gel

### NEW! SENS MATTE TOP GEL

Non-cleansing, soak-off, matte top gel for the durable result.

Easy handling top gel without striping and you can get a velvety surface. It is perfect for new type nail arts because it is non-cleansing. Cure it nails by nails.

4ml

With Matte Top Gel

### NEW! COOL TOP GEL UNIVERSAL NEW FORMULA

Non-cleansing, flexible, soak-off, medium density, beautiful long lasting shine, highly elastic top gel.

The renewed version of Cool Top Gel Universal is suitable for surface smoothing and does not contain the optical brightening ingredient that "glows" the nail bluish when exposed to UV light, so it does not change colors. Excellent for all surfaces. It does not need to be cleansed after curing. Curing time: 2-3 minutes in UV, 1-2 minutes in LED

4ml

13ml

A high-gloss top gel that lasts for weeks, everyone's favorite!

With Cool Top Gel Universal New formula

NOVELTY!

# Xtreme Fusion AcrylGel Renewed White

## NEW! XTREME FUSION ACRYLGEL RENEWED WHITE

Renewed formula with the usual texture and handling that has a beautiful clear white shade that gives nice coverage. Due to its optimal pigmentation, it provides excellent curing. It is a must have shade for Latte effect and babyboomer. Curing time: 2-3 minutes in UV, 1-2 minutes in LED.

30g

"I love Renewed White Fusion Gel because it doesn't turn yellow, it cures without a base coat, and it's a perfect choice for either French or Babyboomer nails."

### Virág Halász

World Champion Bronze Medalist, Olympic Champion; Dublin Triple Gold Medal, Master's Degree in Hand Care and Artificial Nails

New! Hardener Sand

35g

Extremely fine powder

NOVELTY!

# Hardener Sand

## NEW! HARDENER SAND

The popular nail strengthener powder is already available in an economic, big edition

An extremely fine powder that can be very helpful in strengthening the nail. It is recommended to use it when reinforcement is needed, but you want to keep the all-natural look. In this case, apply a thin layer of Compact Base Gel, then spread the Hardener Sand powder evenly with a spatula and cure it. After the curing, apply the color and top gel to the nail in the usual way. The nail made in this way will be more resistant even without a C-arc, and its natural effect will be retained and also soluble.

NOVELTY!

**Glass effect on milky white 2 base**  
The nail set was made with the new Compact Base Gel Milky White 2 and the new Glassy Top Gel Pink and Aqua. The decoration was made with silver transfer foil. (by Dóra Kesztyűs)

# Glassy Top Gel

## NEW! GLASSY TOP GEL

Colorful but transparent non-cleansing, soakable top gels that you can change the color of the nails with a thin layer.

It can be applied on a bright, shiny surface because it doesn't dim the sparkling effects. You can use it for changing colors of glittery gel polishes, Tiger Eyes, and Infinity shades as well and even on the surface of transfer foil, platinum foil, chrome powders, Glam and Diva glitters. It is also good for several nail art techniques. CN advise: Use the Glassy Top Coat in an even layer for the uniform color effect. Therefore it is important that the surface on which it is placed has to be even, as leveling the surface with a colored cover is not recommended because it would result in stained color.

4ml

"Glassy Top Gels allow us to give the glittery bases new colors. I especially like to use it on silver Glam Glitters, but they are a great addition to any decoration materials."

**Dóra Doviscsák (Dorci)**  
Nail Artist, Instagram Influencer

New! Milky White 2

NOVELTY!

# Compact Base Gel Milky White 2

## NEW! COMPACT BASE GEL MILKY WHITE 2

The Compact Base Gel product line has extended with a more intense white shade.

The stronger white milky shade coverage is excellent for latte / milky nails, babyboomer technique and is also great as a base color. You can make beautiful sophisticated nails with it because it can be used well also as a basic color. Soakable, flexible, super dense but easily controllable new generation nail strengthener (base) gel that follows the shape of the nail and provides strong support. Buffalo-strong, perfectly self-spreading "brush-building gel" that gives a more durable, more stable feel when worn. The thickest Base Gel, yet easy to handle. Curing time: 2-3 minutes in UV, 1-2 minutes in LED.

Tropical vacation (gold)

Tropical vacation (silver)

### NEW! DRILL BIT SAFETY (LIFT UP 4.)

Specially designed, grain-free manicure bit for lifting the stuck cuticle and opening the fold. It won't hurt the nail plate at a safe, proper angle, as it has no grains. In some cases, it is not necessary to use any cuticle pusher or orange stick to lift the cuticle. It can be used for all skin types, but it is better to open the strong, long-adhering cuticle in advance. Its rounded head allows safe usage and it is also a recommended choice for beginners. You can work quickly, efficiently and without damage with it and it beautifully prepares your fold for the next steps of your manicure. It is efficient in the back and forth direction, so change the direction of rotation according to the side! Because it has no grains, it can't wear out, making it more durable than any bit.

### NEW! EXPERT FINE 1,2 TWIST MEDIUM DRILL BIT (DIAMOND POWDER)

Expert manicure drill bit series with universal shaped bits. Each bit has a cone shape, as this is the shape that can be used in many ways on most sides of the manicure and the finger. There are times when we need a duller or sharper, narrower or chubby head, you will find the right one in the expert series! There is also a difference between them in strength: the red heads are more refined, suitable for sensitive and normal skin, the blue is a medium strength bit for coarser, drier skin. The Twist bit revolutionizes manicure with a spiral design! It grinds and lifts at the same time, its spiral design makes it easier to remove the dust from grinding. It files and lifts at the same time, its spiral design makes it easier to remove the dust from filing. On the edge of the grain-free and granulated parts. The minimal difference in level between the grain-free and the grained parts as the head rotates continuously lifts the skin and then the grained side polishes it. Herein lies its effectiveness. That's why Twist bits will always be a little stronger, more efficient than their smooth counterparts.

# 13+1 Crystal Nails advise for the summer heat!

During the hot summer times we need to be careful about the right amount of fluid intake, our skin and eyes, but also our favorite Crystal Nails products.

- 1** According to the laws of chemistry and physics, some pigments are changing their color exposed to durable and strong UV light. However, if we change them, some colors would not be so vivid. (Of course the most fading colors are excluded from the outset.) If your client is all day by the pool or the sea the color of the nails will fade. So if your clients come back with this complain, reassure them, the material is not bad: the forgotten clothes also lose their color on strong sunlight. This fact should be mentioned before work.
- 2** The Cool Top Universal contains UV filter to eliminate the color fading.
- 3** Some vivid shade may produce darker stains as a result of UV light, especially if they are coated with Mattever or Cool Top Dark, but if you use Cool Top Universal first with quick curing, this problem will not happen to you.
- 4** The sunscreen turns yellow the lighter colors, especially if you use the Mattever. In this time of the year use Cool Top Universal or the new formula Cool Top Gel Universal which is perfect for every surface, after that just use the softest buffer to create a matte effect.
- 5** In summer every material gets a bit softer, so use denser base gels (Compact Base Gel Plus, Elasty Gardener Gel ans Sens Base Gel)
- 6** In summer heat, the builder gels cure on a higher temperature, which can cause an unpleasant feeling. Choose a lower heat generating material like Xtreme Superior Builder Gel Clear or Xtreme Cool Gel. Intermittent curing is better for sensitive clients. Take out their hands of the lamp in every 3-5 seconds or after 5 seconds cure the nails in diffused light for 20 seconds.

- 7** If you work with powder and liquid, use slower materials and pay attention on the temperature of liquid. The warm liquid cures faster. The double-walled liquid holder helps to keep the liquid on a constant temperature. Warm and humid environment (such a hairdresser salon) helps in fast hardening.
- 8** Use denser materials, which keeps their structure more in the heat like Cover Refill Hard or Cover Refill Hard Tan specially for tanned skin.
- 9** If you work with acrylgels, the Sens Acrylgel is the best choice. It is a good forming material, which doesn't run into the sidefolds even on the heaviest days. You can refill 5 fingers at the same time. It does not heat up, even the most sensitive client can only feel a little warmness. Whether you work with gels or powder and liquid, this material will be there to help you.
- 10** Keep the gel jars closed and clean. If the gel gets on the course of the jar, the sunlight, the incoming or reflected light cures it to the cap. The best way to avoid this, keep the jars in the drawer or in the cupboard. If this problem regularly happens to you, good to have a UV protector foil on the windows.
- 11** Use the Nail Prep, it helps to keep dry even the wet hands.
- 12** The gels are more softer in the summer heat. Pay attention, the gel polish should not run into the sidefolds. We recommend you to apply the C-curve in two layers to keep the material on the right place.
- 13** Keep the gels at the coolest point of your salon. If the summer heat softens the gels, you can put them in the refrigerator until the material gets the original density. Don't keep there for a long time, you can't work with frozen materials for hours.

**+1** In summer, not only guests spend their well-deserved break, but also the nailartists, so it is pretty possible, that your clients will not return in time and you need to slip the appointment a week later. To reach the perfect adhesion for longlasting nails, use Sens Base Gel Clear under gel polishes and builder gels. This extra durability will help to get trough the extra days.
