

STAT KIT® Z-1000

EMERGENCY MEDICAL KIT

ACLS medications and devices are organized for quick access. Add oxygen and an AED for a single, portable emergency response kit.

AED and Oxygen
Sold Separately

STAT KIT® Z-1000 highlights

The STAT KIT® Z-1000 organizes its medications and medical devices into sections, compartments and trays, all clearly label and categorized into key areas of care. This allows the responder to immediately assess and treat the patient without searching for devices and medications.

A complete set of Medications, Devices, Oxygen* and Defibrillation* to provide:

- Basic Life Support
- Advanced Cardiac Life Support (ACLS) for up to 30 minutes
- Pediatric Advanced Life Support (PALS) for up to 30 minutes*

Always up to date

HealthFirst tracks expiration dates of medications and automatically replenishes them before expiration. If you are enrolled in the EMM program, HealthFirst will also replace the used medication in case of an event at no additional cost.¹ Practices benefit by maximizing shelf-life of medications, lowering costs, saving time and gaining peace of mind.

OnTraq

OnTraq is an online account management tool that allows users to view each medication, expiration dates, lot numbers, national drug backorder status, and upcoming medication replenishment shipments.

The STAT KIT® Z-1000 contains the following essential medications and devices:

Medication Trays
