BIOlogicalTM 10

10 Hour In-Office Spore Testing System

System Components:

BIOlogical 10
Steam Biological
indicators

100 indicators/Box
Item# 3703

BIOlogical
In-Office Monitoring
Incubator

100 indicators/Box
Item# 3703

A Breakthrough For In-Office Biological Monitoring

- Spore growth detected as few as 3-5 hours
- Final test results in 10 hours
- Access to online documentation of test results

Easy to use & Easy to read results:

Simply process the indicator in a normal sterilizer cycle. Activate the indicator, place it in the incubator, then see and record the results 10 hours later! If any bacterial spores survive the process, the indicator media will turn yellow.

Complete:

Everything you need for effective biological monitoring of steam sterilizers, including incubator, indicators, manual and access to the OnTraQ online compliance management software.
