Confirm® 10 10 Hour In-Office Spore Testing System

A Breakthrough For In-Office Biological Monitoring

- Spore growth detected in as few as 3-5 hours
- Final test results in 10 hours
- Access to online documentation of test results

Easy to use & Easy to read results:

Simply process the indicator in a normal sterilizer cycle. Activate the indicator, place it in the incubator, then see and record the results 10 hours later! If any bacterial spores survive the process, the indicator media will turn yellow, which indicates a failed test.

System Components:

Confirm 10
Steam Biological Indicators

\$119.95
25 indicators / box
Item# 3650

Confirm
In-Office Monitoring Incubator

\$240.00
Incubator & manual
Item# 3701

Complete:

Simply purchase a box of the Confirm 10 biological indicators (item 3650) along with the re-usable incubator (item 3701) for a complete in-office biological monitoring system for steam sterilizers.
