

SMZ

EMERGENCY MEDICAL KIT

Preparation Brings Peace of Mind.

The SM-Z Emergency Medical Kit is designed for the dental practice that wants to be fully prepared for an emergency that may occur in or near the office. It provides organization and mobility for:

- Emergency Medications
- Life-Saving Devices
- First Aid
- AED
- Oxygen

THE OnTraQ QUALITY REFILL SYSTEM. With HealthFirst's OnTraQ Quality Refill System, medication expiration dates are tracked and drugs are replaced automatically to maximize shelf-life, save money and ensure readiness.

Oxygen and AED sold separately

EMERGENCY MEDICAL KIT

Preparation Brings Peace of Mind.

HealthFirst's new SM-Z Emergency Medical Kit provides organization and mobility to a practice's emergency medications, devices, first-aid supplies, oxygen and AED. It is designed for the dental practice that wants to be fully prepared for an emergency that may occur in or near the office. Its contents represent today's standard-of-care and meet recommendations from the American Dental Association and Dr. Stanley Malamed. The SM-Z organizes its medications and devices into key areas of care, each intuitively organized and labeled for quick access. It features wheels and a telescoping handle for easy transport, which allows the caregiver to arrive, assess and provide care without delay.

Personal Protection

- Gloves, nitrile
- Safety glasses
- N95 Respirator
- Microshield® CPR mouth barrier

- Inspection record

Stay Compliant

The SM-Z includes the **OnTraQ Quality Refill System**, which reduces costs, maximizes medication shelf life, ensures emergency readiness, and gives you the time to focus on your practice and your patients.

The **OnTraQ Quality Refill System** will track, free-of-charge, the contents of your SM-Z and automatically ship you replacement medications. It also provides a pre-addressed envelope for safe disposal-by-mail of your unused medications. You will be billed for replacement medications and the disposal envelope at the time of shipment.

Four Steps to build a complete kit:

1 Buy Your SM-Z at HealthFirst.com or 800.331.1984

P/N: 10005

2 Add Pediatric Epinephrine Auto-Injector

Quickest and easiest way to administer life-saving epinephrine during anaphylaxis in a child

P/N: 2087

3 Add Portable Emergency Oxygen

Quickly take O₂ to the patient's location

E-size cylinder provides up to 30 minutes of O₂

P/N: 6200

4 Add an AED

Compact, easy-to-use, lifesaving technology that is essential for every practice

P/N: AED-HS
