ThinkCentre M920t

Our most powerful and feature-rich desktop supports multiple storage devices, powerful graphics cards, numerous security features and the latest remote management technologies. It's also thoughtfully designed with a carry handle making it easier to relocate, front-accessible USB ports including a USB-C port to charge mobile devices, optional dust filters, and tool-less access to upgrade many of the components.

MAINSTREAM COMPUTING FOR A VARIETY OF BUSINESS USES

The ThinkCentre M9 Series offers more expansion and performance capabilities than any other desktop in our portfolio; perfect for users who need higher computing performance than average.

REASONS TO BUY

Configure with the most powerful desktop graphics – up to NVIDIA GeForce® GTX 1060. For users working with complex spreadsheets, graphics and video, choose both M.2 PCle SSD storage and a SATA drive – this will significantly boost application performance.

Prevent unauthorized access to the PC components with an electronic mechanism that locks the cover from the inside, and is controlled from the BIOS or using remote management tools.

For data analysis workloads configure with more powerful processors and fast SSD storage. Consider additional DDR4 memory for heavy multitasking.
