

ORICO Mini USB Bluetooth 4.0 Adapter

Model:	ORICO BTA-408
Controller:	BCM20702
Interface:	USB
Transfer Rate:	3 Mbps (Theoretical Speed)
Transfer Distance:	20m
Supported System:	Windows XP / Vista / 7 / 8 / 8.1/10

Mini dimension, stable signal

Add Bluetooth to normal computer

It is inconvenient for normal computer without Bluetooth.

Luckily, this little Bluetooth adapter which is small, beautiful and easy to carry, can make normal computer have Bluetooth and apply it.

Broadcom high-performance controller

Fast and stable transmission

Built in BCM20702 controller, transfer speed is up to 3 Mbps which means it only take 8s to transfer a 3M song; good compatibility and stable signal; support stereo Bluetooth, can connect multiple devices.

Dual mode, low consumption

Even can't feel energy loss

Conform to Bluetooth 4.0 specification and backwards compatible with Bluetooth 2.0 / 2.1 / 3.0; support dual mode; consumption is lower 90% than old version, saving more power.

20m long-distance transmission

Signal is full of the room

Built in antenna, Bluetooth 4.0 specification allows transferring from 0 - 20m, better in 10m; 128-bit-AES security encryption provides high safety and acceptability for data packet.

Intelligent sleep and wakening

Reduce energy loss for Bluetooth devices

Support low delay and fast connection; intelligent sleep and wakening reduce energy loss for Bluetooth devices. 24-bit CRC calibration resists interference and adaptive frequency hopping decreases crosstalk, signal more stable.

Colorful appearance

Brighten your mood

Black, white, red, gold, orange, pink and blue, seven colors, choose what you want.
