

The Pinellas County Sheriff's Office is pleased to provide your family with a free software monitoring tool for your use and benefit in exercising computer and mobile phone safety.

Our office is committed to protecting our children from becoming victims of on-line crime. We want to protect kids from exploitation and abduction by Internet predators; we hope to increase the reporting of such criminal activity; and we

strive to provide parents, guardians, and other responsible adults with resources to make our kids' online experiences safe, educational, and fun.

Using computer monitoring software is a personal family decision for you as parents and guardians. Please do your part to keep your children safe online. Whether or not you choose a software monitoring tool, talk to your children about their Internet experiences and their risky decisions.

For more information about cyber safety visit my website at www.pcsoweb.com

Sincerely,

Sheriff Gualtieri
