

This course is an introduction to the basic elements of civil and mechanics. Engineers in any discipline are expected to have good concepts of Building materials, building construction and Mechanics.

**SKU Basic Civil Engineering & Engineering Mechanics** provides some basic information about civil and mechanics. It develops the basic concept for a full understanding of surveying and mechanics. This course has been designed to help students in understanding the fundamental of the subject to develop their ability to deal with any problem.

This will help the students to have a better understanding of the Basic Civil Engineering & Engineering Mechanics from application point of view.

### Topics Covered:

- Building Material and Construction
- Surveying and Positioning
- Mapping and Sensing
- Forces
- Center of Gravity

### SKU Features:

- Rich content with theory and animations
- Interactive Learning Objects
- FAQ
- MCQ
