Why You Need BillingPlatform for NetSuite

Today, many organizations are exploring how to leverage cutting-edge technologies to create new sources of long-term revenue. However, monetizing Digital Transformation is challenging without flexible enterprise billing platforms that can adapt as organizations change.

BillingPlatform for NetSuite is designed to support every aspect of your enterprise's billing operation. We provide total control through integrations with your back-office systems and providing support for complex, usage-based pricing. BillingPlatform is an all-in-one, cloud-based solution that enables any business in any industry.

Who We Are

BillingPlatform's monetization and billing software solution transforms enterprises to embrace digital transformation. This dynamic, cloud-based platform adapts to every unique business model and pricing structure. BillingPlatform provides the most agile and comprehensive solution available including billing, revenue recognition, reporting, and other critical financial functions. We enable enterprises to grow revenue, reduce costs, and improve customer experience.

How We Extend NetSuite

BillingPlatform for NetSuite delivers unique value to global enterprises, providing a means of managing your business with a fully integrated financial ecosystem of all critical front, middle and back office systems. Once in place, this integration simplifies your operation to seamlessly transfer data between systems, saving time and cost while reducing errors.

Features

- Cloud-based platform solution supports subscription and usage-based billing
- Workflow automation engine that simplifies complex, manual processes
- Invoicing and payment features to build stronger customer relationships
- Flexible contract and account management capabilities

Benefits

- Embrace the future by monetizing and delivering innovative products, services, or business models
- Achieve new levels of efficiency with easy automation of your billing processes
- Drive new business success by integrating your financial ecosystem

Our Solution

BillingPlatform empowers your business with a cloud-based billing solution that flexes to your needs. Our open platform architecture adapts to your unique business, industry and customers.

Other, rigid billing systems force your business into their supported models. BillingPlatform gives you complete control over your billing. As a result, you can support any business model and customize any field, contract, or process for your monetization requirements without expensive IT intervention. Our solution is built to thrive in today's fast, global economy.

Leverage BillingPlatform for NetSuite to configure the ideal billing operation for your unique business.
