

Why You Need Blue10

Blue10 helps organizations with cloud software to automate administrative processes, such as the digital processing of purchase and sales invoices, packing slips and receipts. Blue10 automates, controls and provides context in the administrative processes of an organization. This makes Blue10 the ideal assistant for your financial administration.

Who We Are

We are Blue10; an enthusiastic and fast-growing organization. We have a strong drive to get the best out of ourselves every day, striving for the highest level of simplicity, both within our organization and in the cloud software that we offer. We are constantly looking for possibilities to simplify or even automate new parts of administrative processes. We look around us, we listen to the feedback we receive and therefore learn every day. We are convinced that software must be user-friendly and childishly simple and we are taking steps every day towards even more simplicity and user-friendliness.

How We Extend NetSuite

All invoices come together in one system. Blue10 automatically recognizes relevant invoice data and generates a posting proposal for the direct processing of invoices in NetSuite. The invoice is then blocked for payment. With Blue10 it is possible to have an invoice digitally checked by one or more employees. After approval for payment in Blue10, the invoice is unblocked for payment in NetSuite. All invoices are available in a digital archive.

Features

- Self-learning document recognition.
- With Blue10 it is possible to have an invoice digitally checked by one or more employees.
- All invoices are available in a digital archive.

Benefits

- Unlimited number of users and administrations.
- Support and easy start included.
- Transparent pricing model based on a monthly subscription.

Our Solution

With Blue10, booking documents, such as invoices, packing slips and receipts, come together in one system and are seamlessly incorporated into the financial administration. In addition, invoices can be easily forwarded in the organization for the desired approval and are quickly and easily retrieved in the digital archive.

Blue10 – Automates your accounting
