Who We Are

Slimstock was founded in 1993 with the conviction that every business is unique, so every optimization solution should be too. Our team of more than 350 professionals worldwide work with our customers as true inventory management partners, customizing each implementation to achieve impressive results. With this approach, Slimstock has become one of the world's leading inventory optimization companies serving more than 1,000 customers in 60 countries.

How We Extend NetSuite

As a business leader, your focus must remain on ways and areas that deliver the greatest returns. Slim4 helps you in more than one ways to achieve the same. It uses the daily operational data that is generated everyday in NetSuite to extend its capabilities and achieve a greater level of inventory balance. It backs up your NetSuite with efficient forecasting, demand planning and inventory control solutions that start building your revenue from day one.

Features

- Demand Profiling
- Statistical Forecasting
- Dynamic Calculated Safety Stock
- Product Life-cycle Management
- What-if Simulation and Scenario Planning
- Seasonality
- Promotion Management

Benefits

- Automatically optimizing purchase orders for thousands of SKUs
- Explore impact of changes in service level, order quantity, and replenishment cycles
- Create operational efficiencies between planners and purchasing

Our Solution

Slimstock's award-winning inventory optimization platform, Slim4, is an integral solution for forecasting, demand planning and inventory control, and is built to help you get the right inventory in the right place at the right time. Inventory optimization is at the heart of everything that we do. And we dedicate all of our time into developing the skills, knowledge and tools that supply chain teams need to thrive.
