

Authorisations of complementary
and herbal medicinal products
2022

Authorised complementary and herbal medicines, without notification procedure (2019-2022)

In the reporting year 2022, the number of homeopathic medicinal products (606), anthroposophic medicinal products (355), Asian medicinal products (6), medicinal products used in other schools of complementary medicine (5) and herbal medicinal products (413) decreased again. However, the decline in the number of herbal medicinal products authorised over the years is more pronounced.

New authorisations of complementary medicinal products with indication and herbal medicinal products in 2022

Complementary and herbal medicinal products can be authorised using a simplified authorisation procedure in accordance with Art. 14 para. 1 let. b of the Therapeutic Products Act (TPA, SR 812.21) or Art. 14 para. 1 let. c^{bis} TPA. A total of 12 medicinal products were authorised in procedures of this type.

One application was completed in 2022 using the procedures described in Art. 13 (Medicinal products and procedures authorised in foreign countries) and one using the procedures described in Art. 14 para. 1 let. a^{bis-quater} TPA.

Authorised complementary medicinal products without indication under the notification procedure (2019-2022)

The number of authorised homeopathic or anthroposophic medicinal products, medicinal products for gemmotherapy and Chinese medicinal products without indication under the notification procedure increased slightly in 2022 (10,888 medicinal products).

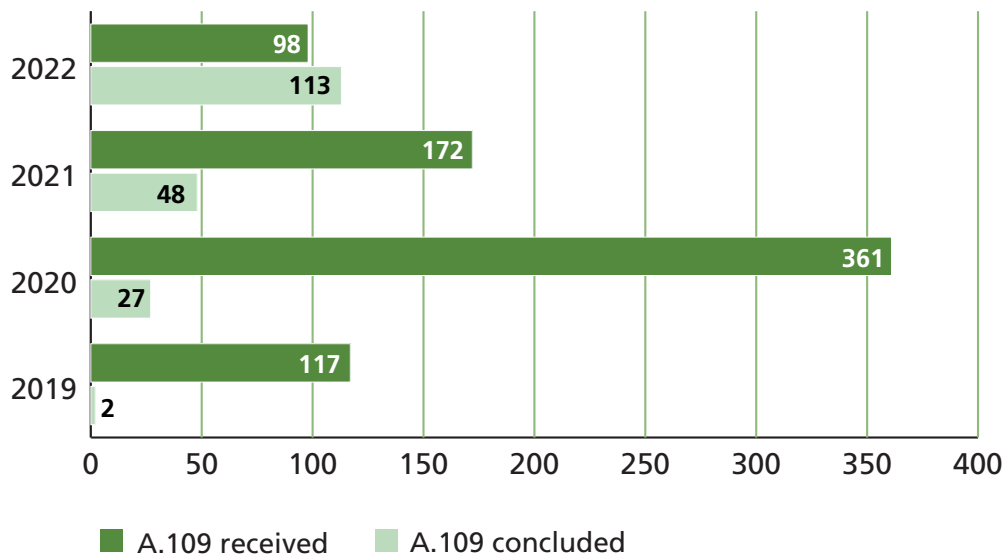

There was an increase in the authorisation of medicinal products for gemmotherapy without indication under the notification procedure from 64 products in 2021 to 96 in 2022.

For the first time, 20 medicinal products used in Chinese medicine without indication were authorised under the notification procedure according to Art. 31 of the Complementary and Phytotherapeutic Products Ordinance (KPTPO, SR 812.212.24).

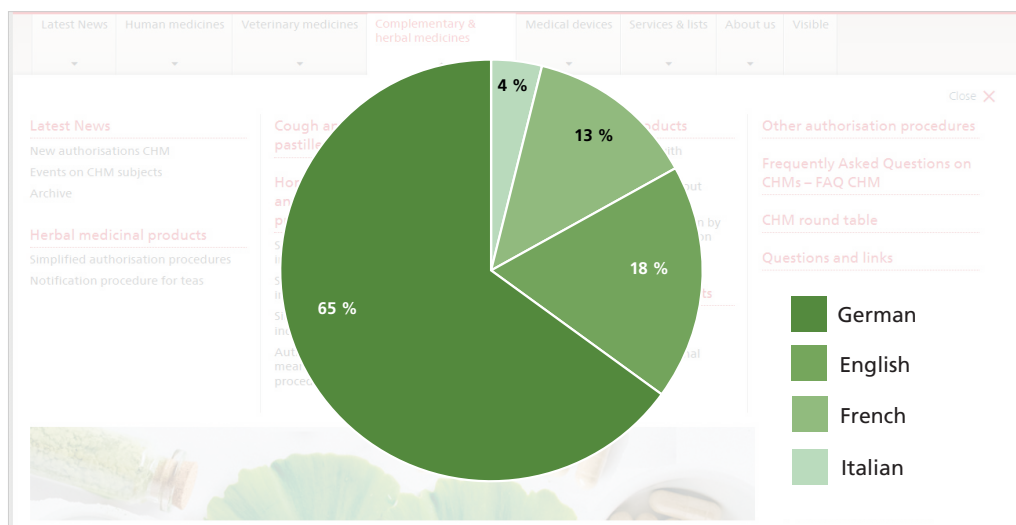

A.109 regulatory changes Implementation of the new requirements in accordance with the revised TPLRO

Full declaration became mandatory for all medicinal products when the revised therapeutic products legislation came into force on 1 January 2019. These adaptations to the requirements are requested with an A.109 regulatory application. In 2022, twice as many A.109 applications were concluded as in 2021 and 2020.

New Complementary and Herbal Medicines (CHM) Division website

The CHM website was restructured and the content was thoroughly revised in all four languages in July 2022. Since then, 11,200 clicks have been recorded across all four languages with the following distribution:
