- ***Emerging Trends Linking Oral and Systemic Health***
- ***There is No Generation Gap Here: Treating Patients from Ages 8 – 98***
- ***Dealing with Difficult People: Strategies for Managing Patients, Co-workers and Bosses***

Course descriptions on back

New

Emerging Trends in the Link Between Oral and Systemic Health

Does having periodontal disease increase the risk of cardiovascular disease, pre-term birth, cancer, or even Alzheimer's disease? Multiple studies have found that periodontal disease is associated with cardiovascular disease. Recent findings in the Journal of the National Cancer Institute found that severe periodontitis was associated with a 24% increased risk for cancer. This course will review current evidence on the link between oral and systemic health and provide talking points for communicating this information to our patients. **2, 3, or 4 hours**

New

Dealing with Difficult People: Strategies for Managing Patients, Co-Workers, Bosses

Do you have a patient that you feel you can never please? A co-worker who always seems to have an attitude? Or a boss who pressures and challenges you at every turn? You are not alone. Everyone has had to face the challenge of dealing with a difficult person. This course will help you develop effective strategies for to help you feel more confident and empowered to take control, manage the situation, and have a more enjoyable workplace. **2, 3, or 4 hours**

From e-Cigarettes to Hookahs: Current Trends in Tobacco & Smoking:

Does it seem as though even less people report cigarette smoking that the use of other tobacco products is increasing? Today, more high school students use e-cigarettes than smoke regular cigarettes. Many partake in multiple forms of tobacco including hookahs and smokeless. Flavored products add to the appeal. This course will examine the changing trends in tobacco use and how they impact oral and systemic health. **2, 3, or,4 hours**

New

The Dental Hygienists Role in Risk-Based Periodontal Therapy

Working with periodontal patients to achieve the best outcome can be one of our biggest clinical challenges. Advances in research indicate that the successful prevention and treatment of periodontal disease hinges on assessing and managing the factors that increase the patients risk for periodontal disease and it's progression. This course will review the factors that increase the risk for periodontal disease and help you create talking points for greater treatment acceptance. **2, 3, or 4 hours**

That's Not What I Learned in School 2.0

Did you learn that floss is the magic elixir preventing everything from caries to bone loss? Or perhaps you are still providing 'routine care' – such as prophys, fluoride treatments, and radiographs. While education provides the foundation, it depreciates over time as new research, therapies, and treatments emerge. This course will empower you to move out of your comfort zone and feel confident adopting new evidence-based strategies for everyday patient care. **2, 3, or 4 hours**

There is No Generation Gap Here: How to Treat Patients from Ages 8 to 98:

Does it seem as though more and more patients of all ages have a complex medical history? It is estimated that 3 in 4 adults over age 65 and 1 in 15 children suffer from 2 or more chronic medical conditions. Rising rates of obesity and a sedentary lifestyle is prevalent in all age groups. It contributes to the early onset of disability and many chronic conditions including heart disease, type 2 diabetes, arthritis, and asthma. This course will empower you understand and feel confident caring for all age groups. **2, 3, or 4 hours**
