Appendix 8 – Summary of Principal and Interest Payments by Fund.....	291

Reader's Guide

This **Reader's Guide** is intended to provide the reader with a basic understanding of the supplement to the 2022 adopted budget, developed from the budgeting process, as well as briefly describe the document's content and layout.

The **Supplement to the 2022 Adopted Budget** provides summary and detailed information on capital projects and financing for the capital program, and additional information for the operating budget, set out in the following sections:

- ❖ The **Capital Project Summary** provides a listing of capital projects for 2022 through to 2027, highlighting related financing sources.
- ❖ The **Capital Project Detail** section gives additional information about each project in the budget, including project descriptions, current year's budget and five-year forecast, cash flow projections, net impact on the operating budget, and previous budget authorizations, if applicable. The capital estimate and service area are identified, as well as the link to OurWinnipeg to ensure all capital projects align with city objectives.
- ❖ The **Listing of Grants / Payments** section provides information on grants in the operating, capital, and reserves budgets. The operating grants/payments are separated in to four categories (annual, long-term, other programs and value in kind).
- ❖ The **Appendices** provide additional context information in support of the budget documents.

Capital Project Summary

2022 Adopted Capital Budget and 2023 to 2027 Five-Year Forecast

Notes:

1. In the attached Capital Project Summary, tax supported capital projects are financed by cash to capital unless other funding is disclosed for the project.
2. Unallocated Province of Manitoba Strategic Infrastructure Funding has not been included in the capital budget. Funding will be reflected in future years as projects are identified.

Capital Project Detail

2022 Adopted Capital Budget and 2023 to 2027 Five-Year Forecast

Notes:

1. Capital Budget amounts are estimates only and are subject to materials management policy (e.g. tenders, bids, and contract awards including Public Private Partnership Proposals).
2. The Public Service uses a cost estimate classification determined using AACE International Recommended Practices for capital budget estimates – see Appendix 2.
3. Included in the capital project authorizations are corporate and departmental overhead amounts (FTE related costs, administrative costs, etc.). Consistent with asset management principles, specific recoveries are included in the capital project business case/basis of estimate. Actual expenses may vary from budget depending on in-year circumstances.
4. Included in the capital budget authorizations, for Public Works only, are amounts for Strategic Municipal Infrastructure Research (SMIR), not to exceed 0.5% of tax-supported infrastructure preservation capital budgets, as approved by Council on April 30, 2003. Infrastructure is defined as permanent physical systems of a community, including roadways, utilities, water, sewage, buildings and parks. SMIR funding is essential to undertake research that will optimize life cycle costs and innovate to provide the best value for construction and preservation of Public Works infrastructure.
5. Capital projects could be aligned to multiple *OurWinnipeg 2045* policy goals; however, the most relevant goal is noted on individual projects. Pending Provincial approval and Third Reading by Council, *OurWinnipeg 2045* will become the guiding development plan for the City.
6. Effective in the 2022 budget, the Federal Gas Tax program has been renamed the Canada Community-Building Fund.

Class Estimate: Not applicable, as this is a scalable program

Projects in 2022 will not proceed to construction until a class 3 estimate is obtained.

Budget is used for the construction of new pedestrian and cycling facilities, facilities enhancements, studies and support for public education, awareness and promotions of walking and cycling. The budget may be utilized for the purchase of land to facilitate the delivery of new and enhanced facilities as required. Funding is also used to support public engagement and design studies in advance of planned road renewals.

PUBLIC WORKS - GENERAL CAPITAL FUND

Pedestrian and Cycling Program (continued):

The Pedestrian and Cycling Program supports the delivery of the City's long-term vision to maximize transportation options by ensuring the accessibility, comfort, and safety of walking and cycling in Winnipeg.

The Director of Public Works may be required to reallocate funds within the Pedestrian and Cycling Program based on financing requirements.

On July 15, 2015, Council approved the Winnipeg Pedestrian and Cycling Strategies (PCS) with the following motion: All costs included in the Pedestrian and Cycling Strategies are estimates, no budget allocation is included with the approval of the Pedestrian and Cycling Strategies document, and all projects and project costs relating to the Pedestrian and Cycling Strategies document will be considered by City Council through the annual budget process. Pedestrian and Cycling Action Plans will be presented to the Standing Policy Committee for information on a yearly basis to provide status updates on previous and current projects.

On July 13, 2016, Council approved the recommendation of the Standing Policy Committee on Infrastructure Renewal and Public Works: That all projects related to the Pedestrian and Cycling Strategies document be submitted to the Standing Policy Committee on Infrastructure Renewal and Public Works for recommendation to Council.

On September 27, 2017, Council approved a first charge against the 2018 Capital Budget of up to \$2.250 million for the Protected Bike Lanes McDermot Avenue/Bannatyne Avenue (Phase 2) project, and approved an additional \$3.850 million in 2017 financed by Interim Financing from General Capital Fund for Chief Peguis Trail - Kildonan Settlers Bridge Pedestrian and Cycling Improvements. Interim financing repayments will be completed by 2022.

On April 20, 2021, the Standing Policy Committee on Infrastructure Renewal and Public Works passed a motion that every September the Public Service shall provide the standing committee with the next year's proposed work plan for the Pedestrian and Cycling Strategies document, highlighting any changes from the current five-year forecast.

Any surplus funds will automatically be transferred to the following year's Pedestrian and Cycling Program Budget. On December 15, 2021 Council directed that any surplus funds from Active Transportation (AT) infrastructure identified as part of the report described in Recommendation 2.J. of the 2022 budget be transferred and dedicated to the following years' AT capital program.

On December 15, 2021, Council directed the Public Service to:

- i. Include active transportation facilities in all road renewals and rehabilitations that have been included in the 2022 Preliminary Capital Budget and 2023 to 2027 Five-Year Forecast, if facilities in those locations have been identified within the Winnipeg Pedestrian and Cycling Strategies.
- ii. That in the event the road project and the active transportation facilities exceed the delegated authorities of the public service, or the project cannot be built as contemplated in the Winnipeg Pedestrian and Cycling Strategies, the Public Service be directed to report back to the appropriate Committee of Council on their recommendation to construct the facilities as prescribed, with a request for additional spending authorities, or recommend an alternate plan to restore the connectivity of the active transportation strategies network.
- iii. Update the Winnipeg Pedestrian and Cycling Strategies in conjunction with the next update of the Transportation Master Plan to ensure that future roads investments requiring AT will be reviewed and analyzed prior to making road investments.

On December 15, 2021, Council directed that the use of land dedication reserve specifically identified in the 2022 capital budget is subject to the Public Service submitting the required reports in accordance with Council adopted policy.

Funding includes \$520,000 rebudgeted from 2013 to 2020 capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this projects on-going nature.

The Pedestrian and Cycling Program supports the following program areas:

Sidewalks Regional and Non-Regional - Various Locations

Includes construction of new sidewalks on regional streets where none presently exist and where provision is warranted. Provides additional funding to support pedestrian crossings improvements and/or crossing upgrades on regional streets. Future locations that are to be determined will be identified through the annual Pedestrian and Cycling Action Plan or through the yearly capital budget process.

Includes construction of new sidewalks on non-regional streets that must meet at least one of the following:

- connect existing sidewalks to a significant destination business/public facility/senior facility, etc.
- is located within 1.5 km of a school and has been identified by a Neighbourhood Based Consultation process (for example a School Travel Plan or Neighbourhood Area Plan);
- is required to connect pedestrians to a bus stop, where the property owners fronting the proposed sidewalk are not considered to be the main or a major benefiter from the new sidewalk, and likely would not support the sidewalk as a Local Improvement.

PUBLIC WORKS - GENERAL CAPITAL FUND

Pedestrian and Cycling Program (continued):

Bicycle Corridors

Development of new bicycle facilities on the Bicycle Network as prioritized in the Pedestrian and Cycling Strategies. Provides support to complete gaps in the Bicycle Network. Supports the supply and installation of permanent and temporary bicycle parking through an annual Bicycle Parking Grant program. Provides additional funding to support the development of Neighbourhood Greenways during local street renewal projects. Considers support for a pedestrian and cycling monitoring strategy. Supports the replacement of pre-cast curbs on existing routes, as required.

Development of Neighbourhood Greenways - bike routes introduced on neighbourhood streets with low vehicle speeds and volumes that may include a range of treatments to slow down traffic and reduce traffic volumes to improve safety for walking, biking and driving.

Recreational Walkways and Bicycle Paths

Construction of new recreational walkways and off-street bicycle path facilities where no walkway or cycle facility presently exists, and where the provision of such a facility is warranted.

Public Education, Awareness and Promotion

Support educational programming, public safety and awareness in support of walking and cycling. Supports the promotion of new and existing pedestrian and cycling facilities including a walking and cycling communications strategy. Considers support for a City-wide wayfinding system.

Partnership Grant Program

The Public Education, Awareness and Promotion grant program provides a funding opportunity for not-for-profit / community based industry partners who promote cycling and active transportation in Winnipeg. Grant applications are submitted, assessed, and approved annually.

Updating information that affects the recommendations in the Transportation Master Plan is necessary to account for temporal changes in land use and transportation needs. This is also required to meet the needs of OurWinnipeg and Complete Communities.

A comprehensive revision commenced in 2019.

Beyond the Transportation Master Plan, follow-up and related projects in 2022-2026 are anticipated to include:

- Winnipeg Population and Land Use Model Update (2022)
- Winnipeg Truck Data and Model Development (2023)
- Winnipeg Areas Travel Study (WATS) Update (2024 and 2025)
- Winnipeg Microscopic Transportation Model (Downtown and Norwood Bridge/St. Mary's/Marion) (2026)

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

This is an annual program which includes city-wide repair and replacement of vehicle detection loops in order to maintain proper (designed) operation of signalized intersections. This program also considers installation of non-intrusive detection in locations unsuitable for loops, subject to funding availability.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Traffic signal bases provide the structural foundation for traffic signal poles and cabinets. As a result, they are crucial for the safe construction and operation of traffic signals. This program is to replace traffic signal bases in poor condition. In total, 502 high-risk bases must be replaced over 10 years (50 per year). This represents 7% of the bases in the City.

This is an annual program which includes city-wide installation of:

- new full signals, half signals and pedestrian corridors based on priority warrant systems **
- roadside safety improvements
- traffic calming measures
- left turn signal phases
- traffic sign upgrades
- railway crossing safety improvements
- installation of permanent pavement markings
- research studies and operational reviews

\$1.0 million of funding in 2022 will support the implementation of projects identified in the administrative report Unfunded Pedestrian Crossing Control Treatments for Traffic Engineering Improvement Program Budget dated September 15, 2021, on a priority basis.

Funding in 2022 includes \$1.0 million rebudgeted from capital budget authorized in 2015 and 2018 - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

** Locations are submitted to Standing Policy Committee on Infrastructure Renewal and Public Works for approval prior to construction.

Projects in 2022 will not proceed to construction until a class 3 estimate is obtained.

On December 15, 2021, Council directed that any surplus funds from Active Transportation (AT) infrastructure identified as part of the report described in Recommendation 2.J. of the 2022 budget be transferred and dedicated to the following years' AT capital program.

Any surplus funds will automatically be transferred to the following year's Regional and Local Street Renewal Program Budget.

Funding includes \$185,000 rebudgeted from the 2017 adopted capital program - see Appendix 4.

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Regional Street Renewal Program

The Regional Street Renewal program includes the renewal and reconstruction of the City's regional streets, sidewalks and recreational walkways/paths, as well as incorporating pedestrian and cycling facilities on regional street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies. The program also funds the condition rating of regional streets. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation facilities into any reconstruction or rehabilitation required on any infrastructure identified as an Active Transportation facility in the Proposed Active Transportation Network. On July 15, 2015, Council adopted the Pedestrian and Cycling Strategies as the long range pedestrian and cycling transportation policy for the City of Winnipeg. Depending on the proposed street renewal treatment and the planning and priority status of the proposed pedestrian and / or cycling facility, the Regional Street Renewal program may implement the intention of the Winnipeg Pedestrian and Cycling Strategies.

All Regional Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Regional Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2022 Regional Street Renewal Program shall be approved by the Standing Policy Committee on Infrastructure Renewal and Public Works.

A Regional Street Renewal Reserve (RSRR) was established in 2014 to increase investment in regional streets. On March 20, 2019, Council approved a change to the RRSR to include repair, renewal, and replacement of bridges. A separate 1% property tax increase planned until 2022 and 0.3% thereafter, will continually fund this reserve each year to ensure a dedicated funding stream for regional streets.

Use of the Regional Street Renewal Reserve for purposes other than regional street, sidewalk or bridge renewals requires approval of 2/3 of City Council.

On March 22, 2018, the City received approval in principle from the Province and on September 4, 2018, received approval in principle from the Federal Government indicating the federal and provincial contributions towards the Accelerated Regional Renewals Application will be in the order of \$100 million from each over 5 years (2019 to 2023).

On March 29, 2019, the City of Winnipeg and the Province of Manitoba executed the "Accelerated Regional Street Renewal Contribution Agreement", and on September 23, 2019, the City of Winnipeg and Canada executed the "Agreement for the City of Winnipeg Accelerated Regional Street Renewal Project". These agreements commit all parties to the funding arrangements as indicated in the Accelerated Regional Streets Renewal Program section of the Regional and Local Streets Program herein.

On December 16, 2020, Council authorized first charges in the amount of \$70.5 million on 2022 accelerated streets in 2021 or prior to the adoption of the 2022 capital budget to facilitate timely delivery of the projects. Refer to attachment 1 of the 2021 Budget Volume 2 - Council Recommendations for specific locations.

On December 16, 2020, Council authorized first charges in the amount of \$10.15 million on 2022 non-accelerated streets in 2021 or prior to the adoption of the 2022 capital budget to facilitate timely delivery of the projects. Refer to attachment 1 of the 2021 Budget Volume 2 - Council Recommendations for specific locations.

On December 15, 2021, Council authorized first charges in the amount of \$37.4 million on 2023 accelerated streets in 2022 or prior to the adoption of the 2023 capital budget to facilitate timely delivery of all 2023 accelerated regional street projects.

On December 15, 2021, Council authorized first charges in the amount of \$31.6 million on 2023 non-accelerated streets in 2022 or prior to the adoption of the 2023 capital budget to facilitate timely delivery of the projects. Refer to Attachment 1 of the 2022 Budget Volume 2 - Council Recommendations for specific locations.

On December 15, 2021, Council authorized a one-time reallocation of the 1% property tax increase toward operating. This reduction in funding from the reserve was replaced with one-time funding from the Canada Community-Building Fund.

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

Local Street Renewal Program

Local Streets are all non-regional streets including residential streets, collector streets, industrial streets, and park streets. The Local Street Renewal program includes the renewal and reconstruction of the City's local streets, sidewalks, and alleys, as well as constructing new sidewalks on local street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies or where the terms for New Non-Regional Sidewalks under the Pedestrian and Cycling Program are met. The program also funds the condition rating of streets, sidewalks, alleys and recreation walkways/paths. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation facilities into any reconstruction or rehabilitation required on any infrastructure identified as an Active Transportation facility in the Proposed Active Transportation Network. On July 15, 2015, Council adopted the Pedestrian and Cycling Strategies as the long range pedestrian and cycling transportation policy for the City of Winnipeg. Depending on the proposed street renewal treatment and the planning and priority status of the proposed sidewalk, the Local Street Renewal program may include new sidewalks where identified in the Winnipeg Pedestrian and Cycling Strategies or where the terms for New Non-Regional Sidewalks under the Pedestrian and Cycling Program are met.

On November 20, 2013, Council amended the Local Improvement process by creating a pilot program for six years (2014-2019) whereby the City of Winnipeg will finance asphalt paving of granular lanes as local improvements to the maximum of 50% of the cost of the improvement; and approved that the \$1 million Granular Lane Fund be used as a funding source for the City's share of the amended Local Improvement Program. On July 19th, 2018, the City of Winnipeg City Council approved a six year extension to this program (2020-2024). The approval of the 2022 Budget will extend the program to 2027. The Granular Lane Improvement Program's annual \$1.35 million includes \$350,000 per year that is dedicated to the lane pulvimixing program.

On July 9, 2019, the City received notification from the Province of Manitoba of a one-time top-up transfer of \$44.09 million in Federal Gas Tax (Canada Community-Building Fund) funds. \$22.5 million will be allocated to 2019 projects, as approved by Council April 25, 2019. \$20 million will be allocated to Local Street Renewals in 2020 and \$1.59 million will be allocated to the Pedestrian and Cycling Program in 2020. During the 2020 budget process federal gas tax (Canada Community-Building Fund) funding was replaced with external debt to allow for reallocation to other capital projects. The City will borrow \$20.0 million in 2020 to offset this reallocation and the Local Street Renewal Reserve will pay principal and interest charges on this new debt. 2020 debt payments are estimated at \$700,000 and 2021 - 2025 are estimated at \$1.120 million each year thereafter.

All Local Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Local Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2022 Local Street Renewal Program shall be approved by the Standing Policy Committee on Infrastructure Renewal and Public Works.

A Local Street Renewal Reserve (LSRR) was established in 2013 to increase investment in local streets, lanes and sidewalks. On March 20, 2019, Council approved a change to the LSRR to include the repair, renewal, and replacement of bridges. A separate 1% property tax increase planned until 2022 and 1.7% thereafter, will continually fund this reserve each year to ensure a dedicated funding stream for local streets.

Use of the Local Street Renewal Reserve for purposes other than local streets, alleys, sidewalk or bridge renewals requires approval of 2/3 of City Council.

On December 16, 2020, Council authorized first charges in the amount of \$7.5 million on 2022 local street renewal projects in 2021 or prior to the adoption of the 2022 capital budget to facilitate timely delivery of the projects.

On December 15, 2021, Council authorized first charges in the amount of \$7.5 million on 2023 local street renewal projects in 2022 or prior to the adoption of the 2023 capital budget to facilitate timely delivery of the projects.

On December 15, 2021, Council authorized a one-time reallocation of the 1% property tax increase toward operating. This reduction in funding from the reserve was replaced with one-time funding from the Canada Community-Building Fund.

As per recommendations B.1 and B.2 of the Road Construction Working Group Report, approved by Council on September 26, 2019, specific local streets are included in the program details. See next pages for program details.

	2022	2023	2024	2025	2026	2027
Class Estimate		3	4	5		
Authorization (\$000's)						
Feasibility		1,000				
Preliminary Design			2,000			
Detailed Design & Construction				17,400		

The overpass on Pembina Highway over Bishop Grandin requires bridge deck rehabilitation, including reconstruction of the exit loop ramps. The timeline for preliminary design, detailed design, and construction is noted in the Class Estimate table above.

Note that construction of a pedestrian-cycling overpass over Pembina Highway, connecting legs of the Bishop Grandin Greenway, is not included in the project scope.

The rehabilitated structure will provide an additional 50 years of service life and the new pedestrian overpass structure will provide a service life of 75 years.

Class Estimate: 4

The scope of work for this project is to examine cost effective functional design alternatives for an active transportation grade separation, in the vicinity of the existing Osborne Street Underpass, to address a gap in the Active Transportation Network to cross the CN mainline. In addition, functional design will be undertaken to review rehabilitation of the existing Osborne underpass to address deficiencies in land drainage, vertical clearance, pavement condition, and traffic operations through the Osborne/Pembina/Corydon/Donald intersection.

Detailed Design & Construction	6,074	15,600	23,200			

The St. Vital Bridge (Red River) connecting Osborne Street to Dunkirk Drive will require bridge deck rehabilitation, including marginal widening, to better accommodate pedestrian and cycling requirements. Preliminary design is scheduled in 2021. The timeline for detailed design and construction is noted in the Class Estimate table above. Construction is expected to be staged over a two year period from 2023 to 2024. The major benefit of constructing this project includes maintaining required service levels related to bridge condition, roadside safety and accessibility requirements. Significant risks associated with constructing this project include project delays due to seasonal river access. Significant risks of not constructing or deferring the project include inability to maintain quality level of service. The rehabilitated structure will provide an additional 50 years of service life.

Construction will not commence until a class 3 estimate is obtained.

This project includes major rehabilitation of the Lagimodiere Twin Overpasses over Concordia Avenue and the CPR Keewatin rail lines. Improvements to traffic capacity and roadside safety will be determined as part of a preliminary design study. The timeline for preliminary and detailed design is noted in the class estimate table above. Construction is forecasted to take place over a two year period from 2026 to 2027 with a total project class 5 estimate of \$39.7 million. The major benefit of constructing this project includes maintaining current levels of service related to bridge capacity and condition. Significant risks associated with constructing this project include project delays related to railway coordination. Significant risks of not constructing or deferring the project include inability to maintain quality level of service. The rehabilitated structure will provide an additional 50 years of service life.

Construction will not commence until a class 3 estimate is obtained.

Class Estimate: Not applicable

The Disraeli Bridges and Overpass Facility was procured using a P3 approach and the facility opened on November 19, 2012.

The City will make on-going lease payments to Plenary Roads Winnipeg (PRW) extending until 2042. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the facility as well as the maintenance of the facility.

There are significant provisions in the contract to ensure the City's performance specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs related to land titles registration are also included in this budget. Payments to PRW are performance based and are reduced where the City's performance specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the facility, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

A portion of the project (\$75 million) was financed by \$25 million in external debt, with the balance being financed internally. The Public Service issued \$25 million in external debt at an interest rate of 3.759% over a repayment term of 40 years. Debt servicing represents interest and principal repayment of external debt and internal financing.

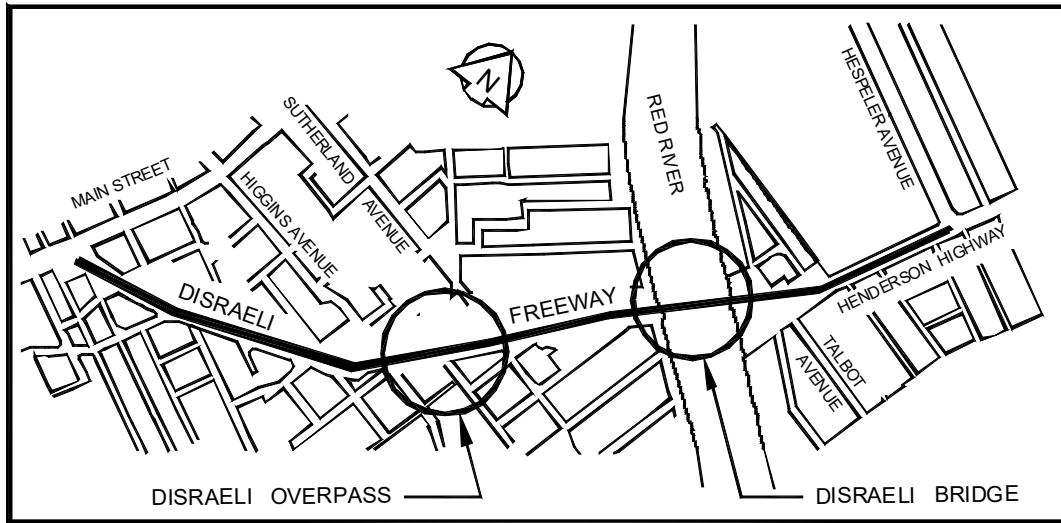

PUBLIC WORKS - GENERAL CAPITAL FUND

Disraeli Bridge and Overpass Facility (continued):

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments and debt servicing related to the facility.

In accordance with Bylaw 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate Administration and Interest charges.

The asset management program in the Public Works Department is centered on the application of quality management principles to the operation, maintenance, and renewal of infrastructure. A primary objective is the development and implementation of methodologies to preserve the infrastructure and to identify the funding necessary for the long term preservation of the assets.

An objective of the asset management program is to extend this systematic structural quality management approach to all the infrastructure under the Public Works Department responsibility. Funds are required to implement new or maintain existing asset management programs.

Refurbishment and/or improvements to various parks to repair aging park infrastructure and related amenities.

Funding in 2022 and 2023 of \$3.66 million will contribute to short and long term implementation strategies for Kilcona Park rehabilitation and enhancements based on the 2014 Strategic Renewal and Action Plan prepared by Hilderman Thomas Frank Cram Landscape Architecture in consultation with Meyers Norris Penny LLP, MMM Group Limited, and Prairie Architects Inc., including the construction of an asphalt roadway which will connect the east and west sides of the park.

Funding in 2022 will further support replacement of the sports field turf at Maple Grove Park (\$900,000). If the funding is approved through the Canada Community-Revitalization Fund for the replacement of the sports field turf at Maple Grove Park, then the funding will be returned to the Canada Community-Building Fund Reserve. Any future incremental costs will either be funded by the area Councillor or will be brought forward to a future budget period.

Prioritization of projects in future years is subject to the Regional Parks Investment Strategy and Parks Strategy, planned for completion in Winter/Spring 2022.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Refurbishment and/or improvements to various parks to repair aging park infrastructure and related amenities, including but not limited to:

- play equipment and safety surfacing
- athletic fields
- sport courts
- off-leash dog areas

Funding in 2022 includes:

- Basketball court in St. Vital Memorial Park, the City's contribution towards celebrating the 100th anniversary of neighbouring Glenlawn Collegiate (\$275,000)
- Pickleball court in Jill Officer Park (\$300,000)
- Fitness nodes in John Forsyth Park (\$250,000)

Any future incremental costs of these three projects will either be funded by the area Councillor or will be brought forward to a future budget period.

Funding in 2026 includes \$70,000 for conversion of King George V Park to an off-leash dog area.

Prioritization of projects is subject to the Parks Strategy, planned for completion in Winter/Spring 2022.

Program is focused on playground restorations, including play equipment and safety surface replacements, along with associated amenity and pathway improvements to enhance accessibility, and other park and recreation enhancements. It is generally delivered by the Planning, Property and Development Department on behalf of the Parks and Open Space Division of the Public Works Department.

Funding is to be allocated annually as follows:

- Approximately \$300,000 each year dedicated to address general playground and amenity safety concerns as they arise city wide.
- Remaining funding to be divided equally between each of the fifteen electoral wards.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: Not applicable, as this is a scalable program

This program supports sustainable urban forest management practices, and may include the following types of works prioritized by need:

- Tree pruning, removals and replacements
- Management of Dutch Elm Disease (DED)
- Emerald Ash Borer Beetle (EAB) response
- Installation of tree vaults and silva cells along major routes (coordinate with street and sidewalk renewals where possible)
- Inventory along City boulevards, plazas, and parks

Funding in 2022 includes a grant of \$140,000 for Trees Winnipeg. A seasonal temporary position (0.75 FTE) is funded by this program.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

PUBLIC WORKS - GENERAL CAPITAL FUND

Capital funding is required to address three areas:

1. Safety issues need to be addressed in many libraries including upgrading lighting, installing and upgrading closed circuit television video monitoring technology, exterior Crime Prevention Through Environmental Design improvements, and other building upgrades, as required, to ensure that libraries remain safe and welcoming to the community and deter vandalism and graffiti.
2. Accessibility issues, both physical and customer service related, need to be addressed including adding exterior ramps, upgrading public and staff washrooms, improving way finding signage, and installing life safety apparatus to meet the needs of persons with disabilities.
3. Signage needs on the exterior and interiors of library facilities, including electronic signs, for promotion of services and programs are required to make libraries more visible to the community.

Each year a portion of the funds will be utilized for projects within library facilities based upon established priorities.

Included in 2024 is \$200,000 rebudgeted from the adopted 2019 capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Winnipeg Library Service supports the digital economy and fosters digital literacy by making public access computers available to all customers. Capital funds are required to upgrade and replace public access and staff personal computers and support new innovative and efficient technology applications in libraries to address the changing needs of customers and move towards consistent service levels in all facilities by:

- increasing the number of public access computers system wide;
- upgrading and replacing aging public access computers, monitors and peripheral devices;
- providing access to public training sessions using current eReader and mobile technology;
- expanding and enhancing information services through technological innovation and digitalization projects.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: 5

The "Library Facility Redevelopment Strategy" was adopted by Council January 29, 2013. Funds are necessary to replace and furnish modern, safe, and accessible libraries that are able to accommodate the changing needs of library users.

Total capital funding for a new West Kildonan Library of \$3.713 million is based on a preliminary class 5 estimate for planning, design, construction, and interior infrastructure and is subject to change as class estimates are refined. The assumption is that West Kildonan Library will be a leased facility; therefore, estimated funding represents this assumption and will be confirmed through a market assessment and Expression of Interest in 2021. The new leased library will be located at an alternate location to better serve the Old Kildonan and Mynarski Wards.

Construction will not commence until a class 3 estimate is obtained.

With an anticipated population of approximately 40,000 to 50,000 people once fully developed, the Waverley West area currently has no library facility. A new community library is planned as an addition to the South Winnipeg Recreation Campus building, providing an integrated, multi-purpose recreation, leisure and library destination. Funding in 2026 includes \$500,000 for Preliminary Design to obtain a class 3 estimate for the library addition and \$1.0 million for site development work related to the overall recreation site including athletic fields, pathways and park amenities.

Incremental operating costs cannot be estimated at this time and will be included when known.

Construction will not commence until a class 3 estimate is obtained.

Class Estimate: Not applicable, as this is a scalable program

This capital program addresses workplace and public safety, health, and accessibility issues.

Recreation and aquatic facility amenities must be refurbished to meet public health and safety standards, regulations, and to enhance facilities to meet the needs of the public including:

1. Safety issues need to be addressed including upgrading lighting, installing and upgrading closed circuit television video monitoring technology, automated external defibrillator replacements at facilities and other building upgrades as required to ensure that facilities remain safe and welcoming to the community.
2. Address physical and customer service accessibility issues including washrooms, change rooms, specialty change rooms, kitchens, signage, public entranceways and installing life safety apparatus to meet the needs of persons with disabilities.
3. Upgrades and replacements to facility signage including electronic signs for promotion of services and programs.

Each year a portion of the funds will be utilized for projects within the City's aquatic facilities and recreation centres based upon established priorities.

Funding includes \$296,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Capital funding is required to replace cardio and strength based fitness equipment, on a rotating cycle, at the City's multi-use recreation and aquatic facilities, to continue to meet the program needs of patrons, and to minimize safety issues that could arise from aging fitness equipment. Life cycle renewal of fitness equipment is a key part of the department's asset management plan in order to maintain customer levels of service.

Funding includes \$197,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: 5

On November 26, 2020, Council approved the Wading Pool Rationalization and Spray Pad Reinvestment Strategy, including the recommendations:

- That where a future spray pad addition is recommended in a ward where there are multiple wading pools within the Targeted Level of Service, that a minimum of one to a maximum of five wading pools be identified for closure in consultation with the area Councillor, based on usage, proximity, and condition of the wading pool amenity.
- That funding for closure of wading pools (where applicable) and reinvestment in alternate park amenities at those sites be included in the project budget approval for future spray pad development projects.

Funding in 2022 is required for the design and construction of a new spray pad at the Valour Community Centre - Isaac Brock site, replacing the existing ageing wading pool.

Other wading pool sites within the area will be considered for closure and reinvestment in alternate park amenities, in consultation with the area Councillor and with input from the community through a public engagement process. Approved funding includes development of the new spray pad, public engagement and any applicable wading pool closures and identified reinvestments in alternate park and recreation amenities at those locations. Estimated project cost is \$1.5 million. Any future incremental costs will either be funded by the area Councillor or will be brought forward to a future budget period.

On December 15, 2021, Council directed that the use of Land Dedication Reserve and Community Incentive Grant funds specifically identified in the 2022 capital budget is subject to the Public Service submitting the required reports in accordance with Council adopted policy.

No incremental operating budget requirements are anticipated due to the closing of at least two existing wading pools and the transfer of those resources to maintain and operate the new spray pad. Any potential operational savings will be confirmed in the 2023 budget once the number of wading pools closures are confirmed.

Project construction will not proceed until a class 3 estimate is obtained.

Class Estimate: 5

On November 26, 2020, Council approved the Wading Pool Rationalization and Spray Pad Reinvestment Strategy, including the recommendations:

- That where a future spray pad addition is recommended in a ward where there are multiple wading pools within the Targeted Level of Service, that a minimum of one to a maximum of five wading pools be identified for closure in consultation with the area Councillor, based on usage, proximity, and condition of the wading pool amenity.
- That funding for closure of wading pools (where applicable) and reinvestment in alternate park amenities at those sites be included in the project budget approval for future spray pad development projects.

Funding in 2022 is required for the design and construction of a new spray pad at the Champlain Community Centre, replacing the existing aging wading pool.

No other wading pool closures are anticipated with this project as the only wading pool in the vicinity is Norwood Wading Pool.

The estimated project cost is \$800,000. Funded by \$400,000 in Canada Community-Building Funds with the remainder from the Councillor's ward funds, which include \$243,000 from their Land Dedication Reserve allocation and the remainder of \$157,000 to be allocated from their Community Incentive Grant Program and Parks and Recreation Enhancement Program allocations. Any future incremental costs will either be funded by the area Councillor or will be brought forward to a future budget period.

On December 15, 2021, Council directed that the use of Land Dedication Reserve and Community Incentive Grant funds specifically identified in the 2022 capital budget is subject to the Public Service submitting the required reports in accordance with Council adopted policy.

There are no net incremental operating costs incurred with replacement of a single wading pool with a new spray pad; recreation staffing costs are reduced but savings are offset with incremental increases to maintenance costs relating to spray pad operations.

Project construction will not proceed until a class 3 estimate is obtained.

Note: all recommended projects are generally based on Class 5 estimates with appropriate contingencies for that scale of design.

On March 20, 2020, Council directed the Public Service to report back within 180 days on a new 3-year recreation and library facility investment strategy of up to \$50 million, starting in 2021 to be funded from the City's anticipated annual strategic infrastructure allocation from the Province of Manitoba. To date the Province has confirmed the 2021 funding allocation. 2022 and 2023 confirmation is pending.

On November 26, 2020, Council approved the Recreation and Library Facility Investment Strategy with a program of projects and investments across the indoor pool, outdoor pool, arena, recreation centre, community centre and library portfolios that renew and redevelop facilities to improve and maintain service throughout the city.

Key principles and strategies to guide recommended investments include:

- i) Address unfunded critical infrastructure needs for the City's most highly used, multi-purpose recreation facilities;
- ii) Prioritization of investments using the City's asset management principles and processes;
- iii) Improve and maintain neighbourhood and community facilities that support higher needs areas of the city;
- iv) Complete the Library Redevelopment Strategy projects previously adopted by Council;
- v) Provide a potential City contribution to an arena twinning/redevelopment process undertaken by Request for Proposals;
- vi) Support grassroots planning efforts of General Council of Winnipeg Community Centres (GCWCC) to guide future community centre investment;
- vii) Providing opportunities to leverage funding through community, corporate and government partnerships.

This program includes a maximum of 1 temporary FTE beginning in 2021 through 2023 to provide overall project coordination and support.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Recreation and Library Facility Investment Strategy (continued):

For each approved project, up to 10% of the allocated budget be approved as a first call in the preceding budget year to facilitate project planning and design.

On November 26, 2020, Council directed that unallocated funds in the amount of \$7.0 million be allocated to the Land Dedication Reserve Fund, to be distributed equally amongst each of the 15 electoral wards over three years and that the use of the funds be subject to the terms and conditions of the Land Dedication Reserve Fund policy.

On December 16, 2020, Council authorized a first charge of up to \$300,000 in 2021 or prior to the adoption of the 2022 capital budget for the Recreation and Library Facility Investment Strategy - Land Dedication Reserve Fund allocation.

On December 15, 2021, Council authorized a first charge of up to \$600,000 in 2023 or prior to the adoption of the 2023 capital budget for the Recreation and Library Facility Investment Strategy - Land Dedication Reserve Fund allocation.

Construction will not proceed on any individual project until a class 3 estimate is obtained.

The \$300,000 forecasted in the 2022 Budget for the GCWCC Plan 2045 will be flowed to GCWCC as a grant through a funding agreement.

Class Estimate: 5

Capital funding is required to develop a regional recreation and aquatic facility that would include a leisure pool, lane swim tank, indoor track, fitness areas, gymnasium and multi-purpose rooms all attached to the newly constructed Transcona Library at the former 1500 Plessis site.

The existing Transcona Centennial Indoor Pool and other facilities in the area are near the end of their service life and are in need of significant investment or replacement. These buildings also do not currently meet accessibility standards and service expectations. The proposed new facility would provide a state of the art, energy-efficient public amenity, while allowing for the decommissioning of existing, aging assets. In addition, northeast Winnipeg has experienced significant growth and currently lacks adequate City-owned recreation space to provide Leisure Guide or drop-in recreation/leisure programming. The proposed facility will provide the multi-purpose and gymnasium space to meet these service needs.

Funding in 2025 is for public engagement, project planning and preliminary design to develop a class 3 cost estimate to inform capital budget requirements. Project construction will not proceed until a class 3 estimate is obtained.

Incremental operating costs cannot be estimated at this time and will be included when known.

Class Estimate: 5

The City is experiencing significant population growth in the southeast region, including new neighbourhoods of Sage Creek and Bonavista as well as established areas of Island Lakes and Royalwood. Service requirements include the need for multi-purpose recreation space, gymnasium space, and a library to serve this growing community. The General Council of Winnipeg Community Centres Plan 2025 also identified the need to build a new recreation facility somewhere in the south-east corner of the city to accommodate the residential expansion associated with these same areas. Through the Neighbourhood Area Structure Plan for Precinct 'K', an approximately 11 acre site in the Bonavista neighbourhood has been acquired by the City which could be a potential site for the recreation/community centre. A site for the library has yet to be determined.

Funding in 2026 is for a feasibility study and market analysis to confirm development options, as well as public and stakeholder engagement to confirm project scope and priorities.

Incremental operating costs for both the community centre and library cannot be estimated at this time and will be included when known.

Class Estimate: 5

Capital funding in the amount of \$1.623 million in 2027 is required for preliminary design to obtain class 3 estimates for the replacement of Freight House Outdoor Pool. Total capital cost is currently estimated in the \$5 million to \$6 million range, and the potential to partner with other levels of government is anticipated.

The existing outdoor pool at this site is in poor condition, does not meet current accessibility standards nor provide adequate play value and amenities to serve this community experiencing higher levels of poverty. The new pool will include contemporary pool features such as an accessible pool access ramp, slides, spray features, shaded seating areas, diving board(s) and a new pool change/washroom and mechanical system building.

Project construction will not proceed until a class 3 estimate is obtained.

Incremental operating costs cannot be estimated at this time and will be included when known.

Capital funding is required for technological initiatives, which allow Community Services to upgrade existing information technology systems and introduce new / innovative technologies. The projects will incorporate technology that will allow increased efficiencies and reliability, and improve service delivery by being more responsive to customers. The funding will be used for hardware, software, and consulting services.

Projects for 2022 may include but are not limited to:

1. Staff Scheduling System to enable enhanced scheduling efficiency of staff at facilities.
2. Facility Utilization Data Collection System for various sites and review of possible pilot sites, including indoor and outdoor pools.
3. Continuation of the Advertising Program which includes the implementation of digital displays signage at Community Services facilities.
4. Electronic reader outdoor signage for multi-use recreation and aquatic facilities.
5. Charging Stations for several indoor pool and recreation facilities.
6. Miscellaneous upgrades including the purchasing and installation of projectors, mobile software, etc.

Included in 2022 is \$5,000 rebudgeted from the adopted 2019 capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Community Centre Renovation Grant Program (CCRGP), approved in February 2012, is to provide up to \$965,000 in dedicated funding to renovation projects for City-owned, board-run community centres in order to maintain and/or improve community centre infrastructure. On March 20, 2019, Council approved an increase to the program with an annual transfer of \$1.035 million starting in 2019 up to 2023. The program is open to all General Council of Winnipeg Community Centres (GCWCC) in Winnipeg, is subject to an application process with two intake periods per year, project evaluation completed by a joint committee of GCWCC and the City, with maximum City contributions to each project of \$100,000 per project, subject to the grant program criteria.

Annually, up to \$965,000 is funded by the Land Operating Reserve. Transfers from the Land Operating Reserve (not to exceed \$1.2 million in aggregate) to the General Revenue Fund (\$235,000 for GCWCC programming grant) and General Capital Fund (\$965,000 for this CCRGP) are to be equal to 15% of the aggregate of gross land sales and the City's proportionate share of land sales derived from government business partnerships for the fiscal year two years prior to the budget year under consideration (e.g. transfer amounts for the 2022 budget year are based on 15% of the aggregate of actual gross land sales and the City's proportionate share of land sales derived from government business partnerships from 2020).

If actual gross land sales and the City's proportionate share of land sales derived from government business partnerships are less than the amount to achieve the maximum \$1.2 million aggregate amount (i.e. \$235,000 programming grant + \$965,000 for the CCRGP) for this program, the transfer to the General Revenue Fund of up to \$235,000 is made first with the residual balance, if any, transferred to the General Capital Fund for the CCRGP.

An additional \$1.035 million per year is provided for the program for five years, beginning in 2019 and is funded from the Financial Stabilization Reserve.

Operating expenses for 1 temporary full-time equivalent, beginning in 2020 through to 2023, are required to administer the expanded program and will be fully recovered through the CCRGP capital.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Community Incentive Grant Program (CIGP), established by Council on March 6, 1985, was designed to encourage non-profit community recreation and sport organizations to undertake capital projects which would result in long-term benefits to the community at large in terms of improved service and facilities.

Community committees are the delegated authority to allocate CIGP funding.

Operating expenses for 1 full-time equivalent Community Development Worker is budgeted in the operating budget and recovered through the CIGP capital for direct costs to administer the program.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

These capital dollars represent the City's ongoing commitment to Assiniboine Park building repairs, upgrades and park improvements.

The first year of funding for this capital grant was 2010 with \$5.123 million provided each year from 2010 to 2019 and \$5.1 million in 2021. The redetermination process for the grant was completed in 2020 and funding has been included at \$5.4 million from 2022 - 2027.

The capital grant authorized through this capital budget is subject to redetermination next planned for 2024.

The release of capital funds is subject to annual explanation and submission from APC of projected cash flow needs, to the Public Service.

Funding includes \$627,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

On July 18, 2007, Council approved the award of a public private partnership (P3) contract for the development and operation of the East District Police Station based on a 30-year lease term. Occupancy date was in September 2008.

The above annual cash flow estimates include the authorization for the lease payments to be incurred and charged to the project in the General Capital Fund. They include technical maintenance, but not utility and other operating maintenance expenses.

As financing and administration costs are implicit in the lease payments, this capital project is exempt from the administration and short-term financing charge.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of the annual capital budget, in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with Bylaw 8164/2002, where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

This project is directly related to the Federal regulations governing Public Safety Answering Point (PSAP) providers.

Winnipeg Police Service (WPS) Communications Centre has been the PSAP for Winnipeg since 1959. Call Takers handle approximately 1,350 calls per day from the public, which includes both 9-1-1 emergency and non-emergency calls.

9-1-1 software renewals will provide reliable support for the latest telephony and 9-1-1 systems with provisions for both video/texting and other technological advancements. Project scope will include upgrades to the Public Safety grade internet protocol network. The system will be renewed on a five-year cycle.

This project is directly related to the Federal regulations governing Public Safety Answering Point (PSAP) providers.

The Winnipeg Police Service 9-1-1 Communications Centre currently uses a hosted computer telephone integration software platform for 9-1-1 and Police non-emergency call handling for the City of Winnipeg.

To maintain the integrity and functionality of the call handling equipment, this system requires the use of proprietary or certified computer hardware.

When the computer hardware becomes out of date and/or obsolete, appropriate security measures cannot be implemented. Further, the operating system requires computer hardware that can support upgrades to the latest versions. This cannot be done on obsolete equipment, causing vulnerabilities and security concerns to the 9-1-1 platform.

The call handling software, currently Motorola Vesta, cannot be deployed to its full potential with version or functionality upgrades on non-supported or out of date computer hardware. With the implementation of Next Generation 9-1-1 (moving 9-1-1 call flow to an Internet Protocol platform) anticipated in this five-year timeframe, there will be an increase in data flow on the call handling equipment. This includes the ability for text, pictures and videos on the 9-1-1 network. The 9-1-1 Communications Centre will require up to date, secure equipment to handle the 9-1-1 data flow for the City of Winnipeg.

- Maintain up to date operating systems, providing sufficient and robust functionality and security
- Support cybersecurity best practice in a 9-1-1 communications centre setting
- Allow for call handling system upgrades as they become available
- Implementation of functionality on the call handling platform including additional data flows from multimedia sources

This project is directly related to the Federal regulations governing Public Safety Answering Point (PSAP) providers.

Funding will upgrade media loggers and related Next Gen 9-1-1 equipment at the 9-1-1 Communications Centre and backup site. The loggers are evergreened on a five-year plan to ensure operations of the main and back-up sites comply with PSAP legislation timelines for bringing systems back online.

On December 16, 2020, Council authorized a first charge of \$1,453,000 in 2021 or prior to the adoption of the 2022 capital budget to coordinate the logger service date with Next Generation 911 delivery.

The helicopter (AIR1) will require an overhaul as part of the scheduled 12,000 hour inspection as dictated by the Canadian Aviation Regulations. This is a restoration process that includes the disassembly, inspection, repair or replacement of parts, reassembly, adjustment, refinishing, and testing of AIR1 and ensures that the helicopter is in complete conformity with the service tolerances specified for continued airworthiness.

On December 16, 2020, Council authorized a first charge of \$602,000 in 2021 or prior to the adoption of the 2022 capital budget to facilitate the timely delivery of the overhaul.

The mobile computing technology in Police Service vehicles must be evergreened every five years due to the obsolescence of this equipment and the harsh environment to which they are subjected. Currently 235 vehicles require mobile computing devices plus a small contingency for spare devices. This includes the evergreening of laptops/tablets and keyboards, docks, modems, antennae, mounting equipment and associated cabling necessary to maintain connectivity with Winnipeg Police Service Public Safety systems. Ergonomically placed computing devices in vehicles are critical for prevention of injuries to police officers.

This project is estimated in US dollars and converted to Canadian currency.

The Winnipeg Police Service will implement an end-to-end solution to effectively record, manage and analyze all of the relevant data streams coming into the 9-1-1- call centre. This includes analyzing location services data, picture, video, caller audio, emergency responder radio audio, and much more.

- Reduction in Emergency Responder arrival times to events – due to better situational awareness of events going on within the city
- Improved response times for non-emergency calls

This will increase emergency services operations level of service as well as the service level provided to Winnipeg citizens. The City will have a heightened level of awareness into what sort of service is being requested and subsequently provided to its citizens. The goal is to provide the city's residents with a more effective emergency response that can scale and match their dynamic set of needs for years to come.

The current .40 caliber duty pistols require replacement. Police agencies and military across North America have already, or are in process of, transitioning to 9mm pistols. Reduced demand for .40 caliber ammunition has resulted in reduced supply with a projected increase in cost, therefore creating an operational increase to the Service. 9mm pistols are easier to shoot with greater accuracy with the same effectiveness at a lower operational cost.

A planning study will be completed to inform Winnipeg Police Service training facility consolidation including an indoor firing range and an active shooter training facility.

Indoor Firing Range: Firearms training is mandatory for all officers. The existing outdoor range does not allow for training in the winter or during inclement weather, which impedes the Police Service's ability to ensure annual firearms qualification and specialized weapons certification requirements are met. An indoor range will allow for year-round officer training and will address constituent noise complaints.

Active Shooter Training Facility: Officers currently receive mandatory active shooter response training in decommissioned facilities, which carries several occupational safety risks to the trainers and the trainees. The program is frequently displaced and relocated due to the unstable nature of the facility conditions. A reliable purpose built facility would enable the program to be delivered in a secure environment.

With this capital funding the Winnipeg Fire Paramedic Service seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

Consolidate St. Boniface Industrial Area station (#9, 864 Marion St.) and Windsor Park station (#15, 1083 Autumnwood Dr.). The new consolidated station will service both the industrial area and Windsor Park area currently served by the two existing stations and house all existing staff and apparatus. This station will also house a relocated ambulance from the Fort Rouge station (#30, 524 Osborne St.). Freed resources resulting from this consolidation will go to the new Waverley West Station.

2022:

- Finalize detail design and begin construction.

2023:

- Complete construction.
- Decommission Marion station (#9) for resale.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Facility Optimization - St. Boniface Industrial Area and Windsor Park Station Consolidation (continued):

The Land Operating Reserve funding amount shown above is based on the assessed value and represents the timing of disposition of the Marion St. Station.

On March 20, 2020, Council received as information the Winnipeg Fire Paramedic Master Plan. On January 28, 2021, Council referred the recommendations outlined in Appendix 2 of the Master Plan to the 2022 Budget process. This project is part of the recommendations in this plan.

On April 29, 2021, Council authorized a first charge of up to \$1.125 million in 2021 or prior to the adoption of the 2022 capital budget to proceed with the tender and award of design services and construction oversight as part of the consultant services assignment for the Windsor Park and St. Boniface station redevelopment.

With this capital funding the Winnipeg Fire Paramedic Service seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

Build a new station in Waverley West to service city growth and address response time issues. This station will be staffed with reallocated resources (staff and apparatus) from the St. Boniface Industrial Park and Windsor Park consolidation.

Site finalization in 2022 will provide a class 3 cost estimate prior to construction in 2023.

2022:

- Preliminary land assessment.

2023:

- Detail design review.
- Begin construction.

2024:

- Complete construction.

With this capital funding the Winnipeg Fire Paramedic Service seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

Consolidate Silver Heights station (#19, 320 Whytefold Rd.) and Portage Avenue station (#36, 2490 Portage Ave.) on the existing Whytefold Road property. The consolidated station will maintain service capability and coverage of both areas. The new station will also house a relocated ladder truck from St. James (#20, 525 Banting Dr.). The sale of land from the Portage Avenue station will be used to offset costs via the Land Operating Reserve.

Detail design review and land use survey is being undertaken in 2027 to update the project to a class 3 cost estimate prior to construction.

On March 20, 2020, Council received the Winnipeg Fire Paramedic Master Plan as information. On January 28, 2021, Council referred the recommendations outlined in Appendix 2 of the master plan to the 2022 budget process. This project is part of those recommendations.

This capital program supports the ongoing replacement of emergency response equipment that is nearing the end of its useful operating life. The replacement timing is set to ensure continuity of front line emergency operation while maximizing the operating life of the equipment and ensuring value for money.

The Fire Paramedic Service needs to replace the following specialized equipment in a cyclical process as it nears the end of its operating life. Funding for this equipment is provided by both the City of Winnipeg and Shared Health. The following list identifies the equipment and the funding source:

Priorities for 2022-2027 include but are not limited to:

City of Winnipeg funded assets:

2022:

- Renewal of emergency call handling equipment;
- Replacement of radio equipment;
- Replacement of emergency responder computer devices;
- Replacement of specialty fire and rescue equipment.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Equipment Obsolescence (continued):

2023:

- Replacement of specialty fire and rescue equipment.
- Replacement of emergency mechanical services equipment.

2024:

- Renewal of emergency call handling equipment;
- Replacement of specialty fire and rescue equipment.

2025:

- Replacement of specialty fire and rescue equipment.

2026:

- Replacement of fire and rescue equipment;
- Replacement of specialty fire and rescue equipment.

2027:

- Replacement of fire and rescue equipment;
- Replacement of specialty fire and rescue equipment.

Shared Health funded assets:

2022:

- Replacement of emergency medical equipment;
- Replacement of radio equipment;
- Renewal of emergency call handling equipment.

2023:

- Replacement of emergency medical equipment.

2024:

- Renewal of emergency call handling equipment;
- Replacement of emergency medical equipment.

2025:

- Replacement of emergency medical equipment.

2026:

- Replacement of emergency medical equipment.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

** Shared Health has confirmed up to \$2 million of its baseline funding to cover the funding effects of the capital program each year, this incorporates this project over all years.

*** The City of Winnipeg will take out debt on behalf of Shared Health for this project. Shared Health will pay the interest and principal on this debt over an 8 year period.

Emergency Vehicle Pre-emption (EVP) takes advantage of the City investment in centralized traffic signal control to provide intelligent traffic signalization for emergency vehicles. This increases priority for approaching emergency vehicles to enable the clearance of the junctions along their route and allowing safer and more rapid progression through to the emergency incident.

EVP was identified as a crucial addition to facilitate the station optimization program in meeting station reductions while maintaining response capability and coverage. Funding in 2026 will allow the Winnipeg Traffic Management Centre and the WFPS 911 Communication Centre to trial pre-emptive software on selective intersections.

Class Estimate: 2

With this capital funding the Winnipeg Fire Paramedic Service (WFPS) seeks to design and purchase a modular, portable fire paramedic station. The modular station will be used to support the Fire Paramedic Strategic Direction for station renovations and optimization and will act as an emergency back-up station, if required. The modular design and portability of the structure means that the facility can be erected quickly on site with limited site preparation and its mobility will allow it to be used during renovations to allow displaced crews and apparatus to be housed as close as possible to the districts they serve.

Funding includes \$3 million rebudgeted from 2019 and 2020 adopted capital programs - see Appendix 4.

In 2022 the modular station will be designed, purchased and installed on existing serviced WFPS land.

Class Estimate: Not applicable, as this is a scalable program

This is an on-going office automation program. Its primary goals are to deliver cost-effective solutions that provide convenient customer service to citizens and to improve organizational efficiencies. These goals can be achieved through expansion of online services, office/workflow automation, re-engineering of legacy systems, electronic documents management, and systems integration (e.g. database synchronization) between Planning, Property and Development's applications and those of other departments.

It is anticipated that maintaining and improving a solid technological framework can provide the basis for organizational improvements that increase efficiency and reliability. In order to improve service delivery, the goal is to make information more accessible, streamline workflows, and reduce any duplication of efforts. It can also be argued that some initiatives such as electronic document submissions are not only citizen-friendly but environmentally responsible as well.

A general program of ongoing system improvement is suggested and is seen as reasonable to ensure the continued longevity and viability of the City's investment in office automation.

City funding is required in order to enable the development of new full body interment sections at Brookside Cemetery, including the installation of new roadways and landscaping. Also, the Cremation Gardens at both Brookside and St. Vital Cemeteries require extending to accommodate new product sales. These revenue-generating products/services will contribute to the Cemetery Service's goal of reaching financial self-sustainability. In addition, these funds are used for landscaping, materials and other costs comprising the City's contribution toward the Military Field of Honour (FOH) refurbishment project, which is described below.

Funding received from Veterans Affairs Canada (VAC), under a joint City-Federal funding agreement, is specifically for the refurbishment of the Military Field of Honour at Brookside Cemetery. The Brookside FOH is considered Canada's most significantly designated Military Field of Honour in which more than 10,000 Veterans, Service Men and Service Women and War Heroes are interred. All interments are marked by the Military Grey Barrie granite upright monument, mounted in a beam. The FOH refurbishment project involves the replacement of failed concrete beam foundations as well as the cutting, pinning, and cleaning of military monuments. VAC have provided funding for the FOH since 2007 and will continue until the refurbishment is complete; anticipated timeline for completion is reduced to five years as VAC now has a funded program in place. The City contributes approximately \$1 for every \$3 contributed by VAC. This five-year program will be completed by 2022.

On October 26, 2016, Council approved that should future VAC funding commitments exceed the amount included in a given year's Cemeteries Improvements capital budget ("the incremental amount"), that the budget be increased by the incremental amount, subject to the execution of a Letter of Agreement. As such, in those instances where VAC provides funding commitments to the City for the refurbishment of Brookside Cemetery Military Field of Honour in excess of the amount included in the capital budget, the appropriate year's Cemeteries Improvements capital budget will be increased by the incremental amount.

The program objective is the functional and aesthetic improvements and required upgrades to public spaces and streetscapes in the Downtown and Exchange District National Heritage Site. The funds enhance accessibility, safety, comfort and urban design quality of pedestrian environments and fulfill the commitment to the "Downtown First" philosophy. The Downtown Winnipeg Urban Design Guidelines provide the guiding principles to support design and enhance the livability of Winnipeg's Downtown urban environment.

The program supports and develops ongoing opportunities for future Public / Private development and redevelopment partnerships and projects such as: Old Market Square, Broadway, Hydro Tower, Millennium Library Park, Bonnycastle Park and the Assiniboine River Walk. Projects have traditionally relied on and/or leveraged other partnership opportunities and have supported private redevelopments.

These public open space and streetscape improvements are over and above and exclusive of work assumed by the Public Works, Transit, and Water and Waste Departments who are responsible for existing infrastructure such as curbs, street and sidewalk repairs, street trees, planters, boulevards, required maintenance, and accessibility standards.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

Downtown Enhancement Program (continued):

Priorities in 2022 - 2026 include but are not limited to:

- Broadway Shoal Lake Fountain Initiative
- Broadway Fountain
- Air Canada Park
- Old Market Square
- Downtown and Exchange District Pedestrian Facilities Enhancements
- East Exchange Interpretative Strategies
- Chinatown
- Public Art Integration
- Halo SHED (Sports, Hospitality and Entertainment District) developments including: 266 Graham Avenue, Garry Street, Smith Street, Edmonton Street and St. Mary Avenue
- Alexander Docks
- Supporting Exchange and Downtown BIZ placemaking initiatives
- Streetscaping support for larger scoped Public Works initiatives
- Broadway pedestrian enhancements

The City of Winnipeg reinvests in partnered projects in Business Improvement Zone (BIZ) districts and Neighbourhood Main Streets. These areas have their own distinct character with their own style of mixed-use, walkable business districts that serve as the cores of their neighbourhoods. These funds provide the opportunity for the residents and business owners to work in partnership with the City, BIZs, private sector, not-for-profit, other funding agencies, and other government bodies. This capital fund gives the incentive for the BIZ groups to go out and match dollars from sources other than the City. This capital fund, through partnerships, assists in stimulating community revitalization.

This enhancement program takes the form of decorative medians, pedestrian lighting, banner poles, special entry nodes, special pavement treatments, character signage, plants, trees and site furnishings, to ensure the renewal and sustainment of the infrastructure that creates a sense of place and destination in and along Business Improvement Zones and on Image Routes.

Projects in 2022 to 2027 are adjusted based upon community readiness and partnership opportunities.

These organizations utilize grants received from the City to leverage additional funding to undertake projects. Any one of the sixteen (16) Business Improvement Zones may be considered and reviewed for the Streetscape Enhancement Capital Grant funding in 2022. Specific allocations to BIZ groups will be subject to Council approval of a separate report in early 2022. Project funding will be delivered as a grant to each BIZ group through legally executed grant agreements.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

On September 24, 2003, Council approved in principle the Public Art Policy of the Mayor's Task Force on Public Art in Winnipeg and directed that the Chief Administrative Officer work in conjunction with Winnipeg Arts Council to develop the necessary procedures for implementing the direction of the policy, including but not limited to those areas relating to governance and funding. Council adopted a Public Art Policy on October 27, 2004.

The Winnipeg Arts Council, as the City of Winnipeg's implementation partner, submits for approval annually, a plan for the works to be undertaken.

This program is exempt from administrative overhead charges.

The City of Winnipeg is legally obligated through the approved Development Agreement Parameters to provide payback on older Developer Agreements based on the approved 48/52 split on the development of park costs. The funding formula is that the City of Winnipeg contributes 52% to the park development costs. Additionally, recognizing the need to do work concurrently beyond the basic requirements of the Development Agreement, these funds will cover provision of basic amenities that are more cost-effective and practical to install at the time of initial development (such as pathways, lighting, site furnishings, tree planting), particularly for linear park developments.

Applications from some of the outstanding (older) agreements are now being received due to the ongoing build out.

Calculations are based on industry consultation and the actual reviewed costs of works as they are completed each calendar year. Capital requirements are updated on an ongoing basis to reflect industry build out and Development Agreement amendments.

The Waterways Branch in the Planning, Property and Development Department has managed the Riverbank Stabilization-Physical Asset Protection capital program since 2001 and maintains a risk-based "Riverbank Asset Management System" which includes assessments of over 200 unique riverbank sites. These assessments are used to identify high risk sites for additional monitoring and proactive or remedial action. The assessments also consider factors related to the probability of slope failure, the rate of erosion, and the consequence if these hazards are not addressed. The cost to effectively provide erosion protection and/or stabilize the City-owned riverbanks identified as critical or significant risk is approximately \$198 million.

To date, nine major priority sites have been stabilized via the Riverbank Stabilization and Physical Asset Protection capital program since 2003; namely, Annabella Street to May Street (2003), St. John's Park (2006), Bunn's Creek (2006), St. Vital Park (2008), Churchill Drive Park (2012), King's Park (2015), Guay Park (2016), Tache Avenue between Provencher Boulevard and Avenue de la Cathedrale (2017), and Wellington Crescent (2021). These projects have protected existing assets, accommodated the safe construction of new infrastructure, and preserved riparian habitat and valuable public river-frontage lands.

Subject to the availability of funding in the future, examples of high priority projects include:

- To protect or accommodate key Active Transportation path connections: Osborne Street (between Brandon and Woodward Avenues), River Road at Minnetonka Street to Rivergate Drive, and Alfred Avenue to Redwood Avenue
- To address aggressive erosion of park lands: Crescent Drive Park, Lyndale Drive Park, Churchill Drive Park, and Maple Grove Park
- To protect burial sites: St. Vital Cemetery

Prioritizations will change over time as riverbank conditions change, as land use changes, as more monitoring results are obtained, or when there are synergies with other City initiatives or external funding programs.

Funding includes \$312,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The project is comprised of these major elements:

- Analysis phase in 2020 and 2021 will determine the roadmap/plan to achieve the required business outcomes and produce the class 3 estimate required to proceed to solution procurement.
- Foundational business process re-engineering will be performed concurrent to procurement activities to prepare for automation of permit processes.
- Solution implementation will require extensive business and technical resources over a 24-month period as optimized business processes are deployed within the selected solution.

The project outcomes will support the move to the digitization of all online functions on the permitting and inspections process, providing improved efficiency by:

- actively managing workflows and workplace monitoring;
- enabling multiple departments, agencies and jurisdictions to share data across a single database;
- supporting online permit and appointment requests, and;
- providing enhanced customer reporting and document management, among many other benefits.

In the event the Permit Reserve Fund does not have sufficient funds to cover the project expenditures in any given year, the General Capital Fund will interim finance until repaid from the reserve.

The 2022 program may include a maximum of 6 temporary capital-funded full-time equivalents. Temporary staffing costs of approximately \$0.93 million are included in the \$4.131 million overall project budget.

On June 24, 2021, Council approval of OurWinnipeg By-law No. 120/2020 included a recommendation that Policy 2.20 be replaced with revised wording: "2.20 Leverage Green Infrastructure. Create a master green space and natural corridor plan by-law that enables conservation, management, restoration, and enhancement of the inherent value and ecological functioning of parks, waterways, natural areas and systems year round, to support the environment, advance climate change adaptation and mitigation, and increase quantity of such lands that can be accessed for recreation, social interaction, active living and connection of people and nature with nature, as population growth occurs." Council also directed "that funding for the development of a Master Greenspace and Natural Corridors Plan By-law be referred to the 2022 budget process."

Council Approval of By-law No. 119/2020, the Complete Communities Direction Strategy 2.0 included the following recommendation be added to the Parks and Recreation Chapter, namely: "4.8 b) A Biodiversity Policy for Winnipeg that will detail, among other things, an ecological network that is interdependent, reciprocal healthy, connected and integrated with the built environment and life on the land; one rooted in Indigenous traditional knowledge of land, community, and ecology. This should include a requirement for an annual report to Council structured in line with Durban Commitments Local Governments for Biodiversity c) A Corridor Plan to protect, and enhance Winnipeg forests, green spaces, natural environment and natural area corridors including Winnipeg's connecting riverbank corridors."

It is anticipated that the development of this by-law will span two to three years. An initiative of this breadth involving cross-jurisdictional collaboration will require the Public Service to work in tandem with external consultants to maintain continuity and ensure that matters raised at committees of Council are addressed. The initial phase is to define the scope of the project and conduct preliminary analyses in order to obtain a class 3 cost estimate prior to finalizing the work plan and issuing a Request-For-Proposal(s) for contract components of the project.

Capital program to fund investments ensuring health/life safety requirements and the highest-and-best use investments associated with preserving continued facility operations that arise annually. Specifically, this program encompasses planned or emergency refurbishment, replacement, repair and maintenance upgrade projects for fire and life safety (e.g., emergency lighting), heating, ventilation, air conditioning, electrical, plumbing, building envelope, structural requirements, emergency power generation, and uninterrupted power systems. Funding is also allocated for critical systems including building automation and climate control, security, access control, and closed-circuit television systems. This program also ensures adherence to regulatory compliance upgrades, asbestos and other hazardous material remediation, and asset condition assessments. Finally, this program addresses physical accessibility issues such as lighting, signage, and public entranceways.

Funding includes rebudgeted amounts totalling \$1.873 million from adopted 2018-2019 capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: Not applicable, as this is a scalable program

On December 17, 2013, Council approved \$1.671 million in capital funding for the reopening of Sherbrook Pool. The funding consisted of \$0.2 million from the Mayor's 2013 Civic Initiatives Fund, \$0.4 million from the 2014 Parks and Recreation Enhancement Program, \$0.6 million from the Daniel McIntyre Recreation Initiative, \$0.271 million from Building Communities Initiative (BCI) II - Phase 3 (formerly "Recreation and Leisure Facilities" amended by the City and Province October 2, 2013) and \$0.2 million from the Municipal Accommodations operating funds. On June 27, 2014, BCI Policy Committee approved an additional allocation of \$0.15 million from BCI II - Phase 2.

On March 7, 2014, it was announced that the Kinsmen Club of Winnipeg will make a Sponsor Winnipeg contribution of \$1 million towards the renovation of Sherbrook Pool. Subsequent to this announcement, the City learned that such contributions are now deemed subject to GST, reducing the net contribution from \$1 million to \$0.952 million. On May 16, 2014, the Province announced a contribution of \$1 million in 2015 Manitoba-Winnipeg Infrastructure Agreement funding toward the rehabilitation project.

On September 24, 2014, Council approved that the Kinsmen Club, if required, be provided with the option to extend the time period for the payment of their sponsorship contribution to a 9-year period with the final payment to be received by the City in 2022. It was anticipated that \$572,000 (60%) in payments would be received by the end of 2015 with payments of \$95,000 (10%) each year from 2016 to 2019.

ASSETS AND PROJECT MANAGEMENT - MUNICIPAL ACCOMMODATIONS

Sherbrook Pool (continued):

On January 27, 2016, Council approved a revised payment schedule for the Kinsmen Club as follows: the first payment of \$500,000 (i.e. \$476,000 net of GST) to be received by the City on or before March 31, 2016; the remaining payments of \$100,000 (i.e. \$95,000 net of GST) per year to be received on or before December 31 in each year beginning with the year 2016 and continuing until December 31, 2020 with all payments totalling \$1 million including GST. The expected payments of \$476,000 before March 31, 2016 and \$96,000 in 2016 equals the Council approved 2015 budget of \$572,000. Kinsmen Club, if required, was also permitted to extend the time period of the payment of its sponsorship contribution to a 9-year period with the final payment to be received by the City no later than 2024. The Kinsmen Club exercised this option in 2019 and remitted \$48,000 (\$50,000 net of GST) and will remit the remaining \$144,000 in \$48,000 installments from 2020 to 2022.

The City Clerk's Department, Archives and Records Control Branch, supports records and information management City-wide, manages access and privacy responsibilities for the City, and operates the City of Winnipeg Archives and the Corporate Records Centre. The move to the new Corporate Records Centre at 1450 Mountain Avenue has enabled the branch to increase storage capacity for records scheduled for retention under the records management by-law, utilize specialized shelving solutions to better accommodate variable sized box transfers from departments, and realize operational efficiencies. Archival storage and public access/research services continue to be delivered out of a leased facility at 50 Myrtle.

Ongoing development of the Corporate Records Centre is essential to meet the City's records management requirements. Cost-effective storage and inventory management services enable departments to better manage records in accordance with the Records Management By-law 86/2010 ("by-law"), regulatory requirements, and the administrative standard, resulting in an increase in routine transfers of records out of expensive operational space to the more cost-effective Corporate Records Centre.

This project will ensure that the Corporate Records Centre continues to meet demand for storage of records scheduled under the by-law. Costs will include installation of additional specialized shelving solutions and the purchase of equipment to manage the growing inventory to ensure that City records are protected as required by law, and can be accessed and retrieved in an effective manner.

A further capital project will be established at the five-year mark from this project. Development of the Corporate Records Centre supports the City's commitment to increased transparency and better response times to requests through access legislation.

In accordance with the Department's statutory responsibility to compile a List of Electors and convene elections, every four years the department ensures the renewal of equipment and systems used in election processes.

As some of the systems are only used every four years, they require either extensive renovations or complete rewrites to allow them to function with changed systems, networks, and databases. Systems which need to be upgraded / revitalized for the 2022 election include the List of Electors system, Geographic Information System mapping, election night reporting systems and web sites, especially those utilizing the Internet for increased security and more effective communication with candidates, media, and the public.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The City Clerk's Department provides live streaming, live television broadcast, recording and providing various audio / video capabilities in six separate meeting areas, including the Council Chamber. In 2020, in response to social distancing regulations, put in place to mitigate the spread of COVID-19, the Department also began to facilitate meetings of Council, Committees and the Board of Revision online via the Zoom platform in the Council Chamber, the Committee meeting rooms and the Board of Revision meeting rooms. These facilities are used for 300+ meetings of Council and its committees, and for up to 5,000 appeal hearings each year.

The equipment used to facilitate these meeting is used virtually every day. Equipment includes automated cameras, microphones, speakers, amplifiers, digital recorders, live streaming boxes, closed captioning converters, digital storage, and television broadcast stations. Much of the equipment currently used was purchased in 2017 and typically has a five-year life span, but is already showing its age as some temporary upgrades had to be made in 2020 to accommodate conducting meetings via Zoom. A more permanent solution will require additional upgrades to ensure the various feeds can be accessed by newer technology.

The Department also undertakes over 200 protocol events annually including openings, announcements, and flag raisings, where audio and other pool sound, and other technology is required. Equipment used for protocol events including speakers, amplifiers, pool sound, etc. is often used outdoors and is required to be moved from event to event. As such, the equipment is subject to wear and tear and does require regular maintenance and replacement to ensure 100% operational ability and reliability.

A two-year Economic Response and Recovery Plan, subject to Council approval, is to provide Council with the tools to guide prioritization of strategies and actions, based on OurWinnipeg principles, to promote job and economic growth, equity and resiliency. There is a focus on coordination of recovery efforts for the downtown with Downtown Winnipeg BIZ and their partners in the Downtown Recovery Strategy. The five pillars in the Downtown Recovery Strategy (DRS) requests a financial contribution from the City of Winnipeg and each of the other two levels of government. The public service proposes to accommodate this request through the following:

Allocate up to \$10 million from the City of Winnipeg's 2021 Canada Community-Building Fund (formerly known as gas tax funding) towards the projects identified in the Downtown Recovery Strategy, subject to finalizing details and costs associated with these projects.

This program will fund projects that support economic development in the City focused on revitalizing downtown. To achieve a total of \$10 million, \$9.5 million is to be sourced from the Canada Community-Building Fund plus \$500,000 funded by external debt to cover ineligible costs. Recommendations to Council on specific projects will be made by the Standing Policy Committee on Property and Development, Heritage and Downtown Development with input from the Public Service and the Downtown Recovery Strategy team.

On November 25, 2021, Council approved the Economic Response and Recovery Plan. Public Service was directed to consider the recommendations provided by all Community Committees for alignment with the COVID-19 Economic Response and Recovery Plan Framework, eligibility under the Canada Community-Building Fund criteria, and geographic distribution of projects, and report back to Council as follows:

A. Through the Standing Policy Committee on Property and Development, Heritage and Downtown Development, for all projects which qualify and fall within the scope of the Downtown Recovery Strategy and the area covered under the Downtown Winnipeg Zoning By-law 100/2004.

B. Through the respective Community Committee, for all other projects which qualify and are not covered by Recommendation A.

Construction will not proceed on any individual project until a class 3 estimate is obtained.

A two-year Economic Response and Recovery Plan, subject to Council approval, is to provide Council with the tools to guide prioritization of strategies and actions, based on OurWinnipeg principles, to promote job and economic growth, equity and resiliency. There is a focus on economic recovery efforts encouraging social distanced activities to support physical and mental health of Winnipeggers, to address the needs of residents and in under-served areas.

Projects will be focused on:

- Improving regional parks infrastructure to accommodate social distancing measures.
- Adding splash pads while at the same time either de-commissioning or converting wading pools into accessible playgrounds to promote outdoor safe recreation in under-served areas to align with the Wading Pool Rationalization and Spray Pad Reinvestment Strategy approved by Council on November 26, 2020.
- Enhancing active transportation infrastructure.

This program will fund projects that support economic development in the City focused community recovery and specifically in under-served area. To achieve a total of \$10 million, \$9.5 million is to be sourced from the Canada Community-Building Fund plus \$500,000 funded by external debt to cover ineligible costs. Recommendations to Council on specific projects will be made by each of the five Community Committees with input from the Public Service in 2022.

The Innovation Strategy Program (ISP) will enable the City to create innovative ideas, utilize innovative technologies, and approaches to improve existing systems, tools, and processes to primarily reduce costs or increase revenue, improve service levels, and add new capabilities. This will enable the Director of Innovation & Technology Services to fulfill the mandate of driving innovation for the City of Winnipeg to be smarter, more efficient, and more effective in meeting the needs of a growing City.

Winnipeg currently operates below optimum service levels in many areas. Adequate resource levels are often cited for the gap between what should be delivered and what is delivered for both external, citizen centric services as well as internal, administrative services. Prior to 2019, consideration of innovation to explore alternative technologies, ideas, processes and build new capabilities to bridge the gap has been limited. Winnipeg is filling its resourcing gap with innovation capability and outcomes that focus on offering a return on investment.

Projects within the ISP will be selected and delivered to build and reinforce a culture of innovation and provide the City with tangible outcomes. Transforming how services are delivered, or changing the service levels that a service can provide will be the focus. These projects will be delivered with a balanced approach that blends Innovation Engineering methods with the City's project management principles. Projects undertaken as part of the ISP will produce expected benefit of operational efficiency gains, cost avoidance, citizen impact, revenue increase and cost decreases. The anticipated benefits will be signed off by applicable department heads prior to project commencement.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Innovation Strategy (continued):

The portfolio of innovation investments may include, but not be limited to:

- Innovation Technology Pilots will encompass pilot and trial projects that focus on the applications of novel technologies or novel applications of commodity technologies to business problems with an emphasis on identifying small projects that answer questions and test hypotheses to better inform future incrementally larger trials.
- Innovation Business Process Enhancement will look at the application of business modelling techniques to existing business processes that are currently a significant bottleneck or hindrance. This will focus less on technology and more on addressing the human and organizational business process elements and how those can be optimized for cost savings through appropriate analysis and application of Innovation Engineering methodology.
- Innovation Prototyping represents a collection of small projects aimed at testing concepts in a fail-fast-fail-cheap mindset. If efficiency gains are proven, they will often be the precursor to projects started in the other areas. These small initiatives will aim to gather information about the viability of an idea, technology, or approach in order to ensure that follow-up project decisions are made with demonstrated value.

The 2024 program may include a maximum of 2 temporary capital funded full-time equivalents.

Included are rebudget amounts totalling \$307,000 from adopted 2015-2019 capital programs - see Appendix 4.

The program budget is available for the Director of Innovation & Technology Services to make allocations to projects as deemed necessary.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature. totalling

The City runs its on-premise information technology infrastructure in three datacentres that addresses the business requirements of a wide variety of critical business functions (311, PeopleSoft, Property Assessment, Taxation, Permitting, Parking Enforcement, Public Facing Internet, etc.). The datacentre infrastructure has a finite lifespan and needs to be replaced (evergreened) on a periodic basis to ensure its continued operation and support of the business functions. There are also requirements to expand the capacity of this infrastructure to support the growing requirements of the organization.

Funding includes rebudgeted amounts totalling \$282,000 from adopted 2015-2019 capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Information Security Initiatives will provide the minimum acceptable level of protection against the rapidly increasing number of threats to City business systems. The program will implement the processes, tools, and people elements required to manage the risk. Without the program, the City will be facing levels of security risk that could cause widespread business impact and prevent the City from meeting legislated responsibilities for the confidentiality, integrity, and availability of critical data.

Operating costs are for software support and maintenance. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Funding includes rebudgeted amounts totalling \$985,000 million from adopted 2015-2019 capital programs - see Appendix 4.

Organizational Support Services depend on modern industry technologies for the delivery of their City-wide supports. As business needs continue to grow and change, so does the need for enhancement to existing systems, or entirely new systems to support these changes.

The Intake Program will provide a way for initiatives, which have been estimated to cost under \$100,000, to secure capital funding. This ability will improve the digital dexterity of the organization and better position the City of Winnipeg for a sustainable future. Projects within the program will be prioritized based on highest positive citizen impact, business value, return on investment projection, and cross organizational use.

Operating costs are for support and maintenance. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Funding includes rebudgeted amounts totalling \$171,000 from adopted 2015-2019 capital programs - see Appendix 4.

The City utilizes enterprise servers and storage and systems software infrastructure to address the computing requirements of a wide variety of critical business functions (311, PeopleSoft, Property Assessment, Taxation, Permitting, Parking Enforcement, Public Facing Internet, etc.). This infrastructure has a finite lifespan and needs to be replaced (evergreened) on a periodic basis to ensure its continued operation and support of the business functions. There are also requirements to expand the capacity of this infrastructure to support the growing requirements of the organization.

Funding includes rebudgeted amounts totalling \$1.246 million from adopted 2015-2019 capital programs - see Appendix 4.

This program may include a maximum of 1 temporary capital funded full-time equivalent.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The funding is for system upgrades and rehabilitation to key assessment and taxation systems that interface with the two main Computer Aided Mass Appraisal and Manta systems. There are approximately 40 subsystems that interface directly to these systems and funding is required to ensure that they continue to work effectively and efficiently with upgraded platforms and operating systems.

Included in the 2022 authorization amount is a re-budget of \$185,000 from the 2017 Assessment Automation capital program - see Appendix 4.

The initiatives in this program may include a maximum of 3 temporary, capital funded full-time equivalent positions in 2022 and future years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Local Improvement capital projects are those which are financed partly by a direct levy on the properties benefited. The program is governed by Local Improvements By-law No. 98/72 and is subject to advertising and subsequent approval by the majority of ratepayers involved. The types of expenditure generally falling within this category are: paving of local streets and lanes; sidewalk and boulevard construction; installation of new watermains and sewers; ornamental street lighting and lane lighting.

The Transit Information Technology Program mainly provides technology upgrades to systems that support interaction between Transit operations and the public for improved technology throughout the department.

Transit also uses this program to implement innovative practices throughout the department to improve efficiency. Equipment related to achieving this innovation may be funded through this program.

Includes 2 Analyst Programmer full-time equivalent (FTE) positions for ongoing technology upgrades and 3 FTEs related to the redevelopment of Transit's Maintenance Management Information System (MMIS) including 1 Project Coordinator, 1 Information Specialist, and 1 Analyst Programmer.

Included in 2022 is a rebudgeted amount totalling \$209,000 from the adopted 2009 capital program - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: Not applicable, as this is a scalable program

Surplus funds will automatically be transferred to the following year's Transit Building Replacement/Refurbishment program budget.

Transit's operations are housed at three primary locations - The Fort Rouge complex, North Main garage, and Brandon garage. The Fort Rouge and North Main facilities are approximately 40 and 80 years old, respectively, and are operating at capacity. The department funds the maintenance of its facilities through the operating budget; however, many of the structural, mechanical and electrical systems in the existing facilities are past their design and economic lives and capital funding is required to bring the facilities up to acceptable standards.

This multi-year capital program addresses the need for smaller scale projects within Transit's existing facilities and stations. These projects are mainly required due to the age and condition of the assets.

Includes 2 temporary capital funded full-time equivalent Project Coordinator/Manager positions.

TRANSIT - TRANSIT SYSTEM FUND

Transit Building Replacement / Refurbishment (continued):

Project (in \$000s)	2022	2023	2024	2025	2026	2027	Total
Projects may include but are not limited to a tunnel water proofing, water line replacement, fire alarm system upgrades, emergency lighting upgrades.	642	4,572	1,736	688	4,340	600	12,578
Total	642	4,572	1,736	688	4,340	600	12,578

Included in 2022 is a rebudgeted amount totalling \$142,000 from the adopted 2019 capital program - see Appendix 4.

Estimated useful life - dependent on the specific project.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Surplus funds will automatically be transferred to the following year's Transit Roof Replacement and Ventilation Upgrade project budget.

Transit's Fort Rouge Garage (FRG) at 421 Osborne Street includes two major buildings that total approximately 480,000 square feet in area. The buildings were constructed in 1969 and 1978 and house over 70% of Transit's bus inventory.

The Fort Rouge campus storage, maintenance, and administration facilities require replacement of the existing ventilation systems (which includes makeup air units and exhaust fans) in response to a regulatory change in allowable levels of airborne nitrogen dioxide (NO2) in diesel exhaust, age, inefficiency of equipment, and pressure imbalances throughout the buildings.

TRANSIT - TRANSIT SYSTEM FUND

Transit Roof Replacement and Ventilation Upgrade (continued):

The breakdown below is subject to change, but estimated as:

Project (in \$000s)	2022	2023	2024	2025	2026	2027	Total
Phase 1 Ventilation Upgrades - Repair Garage - High Bay West	1,700						1,700
Phase 2 - 4 including Repair Garage - High Bay Centre, High Bay East, Stores and Low Bay		2,350	2,450	2,500			7,300
Total	1,700	2,350	2,450	2,500	-	-	9,000

Included in 2022 is a rebudgeted amount totalling \$85,000 from the adopted 2019 capital program - see Appendix 4.

Estimated useful life - dependent on the specific project.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Surplus funds will automatically be transferred to the following year's Transition to Zero Emission Buses (Formerly Transit Buses) program budget.

TRANSIT - TRANSIT SYSTEM FUND

Transition to Zero Emission Buses (Formerly Transit Buses) (continued):

This multi-year project is for the transition from diesel buses to electric battery and/or electric fuel cell buses. The transition begins with a Pilot Project and the purchase of electric buses plus refueling infrastructure to identify the appropriate technology and infrastructure to support a transition to a zero-emission bus fleet. Pilot testing will be completed in 2023 and the purchase of additional electric buses will begin in 2024.

As part of the transition plan, the project also includes the purchase of diesel buses for the replacement of buses that have reached the end of their useful life. Costs include all outfitting costs associated with these purchases.

	2022	2023	2024	2025	2026	2027
Forecasted Number of Electric Buses Included in Budget and Forecast above **	16		18	18	53	20
Forecasted Number of Diesel Buses Included in Budget and Forecast above **	30	30	15	15	15	
Total	46	30	33	33	68	20

Includes 2 temporary capital funded full-time equivalent (FTE) positions including 1 Coordinator Contracts and 1 Project Manager.

Estimated useful life - 18 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

** The projection of the number of buses included in the budget is provided as an estimate only and is subject to change as the price per bus and model selected is based on a number of factors. These factors include the movement in the Statistics Canada Monthly Industrial Product Price Index which is influenced by the fluctuation in the Canadian currency and inflation, the timing of order placement in relation to the budget approval, operational requirements and changes to technology or product development.

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program funding. The delivery of this project is contingent on this project being approved and the Federal and Provincial funding sources being confirmed.

Operating costs reflect savings in diesel fuel and maintenance, offset by incremental salaries to support the new zero emission fleet. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Future operating budget impacts, following project completion, may need to be adjusted.

Class Estimate: Not applicable

The Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (SWRT) was approved by Council on June 25, 2014 using a Public Private Partnership (P3) approach and the transitway opened on April 12, 2020.

The City will make on-going lease payments to Plenary Roads Winnipeg Transitway LP (PRW) extending until 2049. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the Transitway as well as on-going maintenance.

There are significant provisions in the contract to ensure the City's specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs are also included in this budget. Non-performance deductions may occur where the City's specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the Transitway, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

TRANSIT - TRANSIT SYSTEM FUND

Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (continued):

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments, debt servicing, and other charges related to the facility.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of annual capital budget in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with By-law 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

On April 29, 2021, Council approved that effective January 1, 2024, the funding source for the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve be changed from 10 years of dedicated annual 0.33% property tax increase (2016 - 2025) to eight years (2016 - 2023).

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate Administration and interest charges.

* N/A - No amounts have been included in the "Previous Budgets" related to P3 Annual Service / Finance Payments due to this project's on-going nature.

The proposed project would see the replacement of existing bus radio hardware, equipment, and Intelligent Transportation Systems (ITS). The project would include replacement of radios on the entire Transit fleet currently approaching the end of useful life.

Includes 10 temporary capital funded full-time equivalent (FTE) positions - 7 of these are for system development and testing (including 1 Business Analyst, 1 Researcher, 1 Project Manager, 3 Software Developers, and 1 ITS Tester), and 3 FTEs for installation (including 2 Radio Installer and 1 ITS Installer).

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program funding. The delivery of this project is contingent on this project being approved and the Federal and Provincial funding sources being confirmed.

Operating costs reflect incremental increase of P25 Opex (operating expenditures) and fiber optic connection charges, plus salaries to support the new system. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Future operating budget impacts, following project completion, may need to be adjusted.

The proposed project would see the replacement of Winnipeg Transit's existing North Garage currently located at 1520 Main Street at a new location. The project includes the development of an energy efficient bus storage and light maintenance facility with increased bus capacity, designed to facilitate the transition to a zero-emission bus fleet.

Debt and finance charges will be funded from the Transit Infrastructure Reserve and are not shown in the Net Operating Impact table above.

TRANSIT - TRANSIT SYSTEM FUND

North Garage Replacement (continued):

Includes 1 temporary capital funded full-time equivalent (FTE) Project Manager position.

Major benefits of replacing the North Garage include:

- Supports the transition to a zero-emission bus fleet
- Maintains essential level of service
- Improves bus storage capacity
- Improves health and safety of staff

Significant risks of constructing the project:

- Acquisition of land
- Resource availability
- Change in market conditions
- Funding agreement approvals/delays

Significant risks of not constructing or deferring the project:

- Inability to meet new / updated building regulations
- Inability to maintain essential level of service
- Inability to accommodate future growth

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program (ICIP) funding. The delivery of this project is contingent on this project being approved and the Federal and Provincial funding sources being confirmed. The previous budget is consistent with the Council approval of the Transit ICIP report.

Upon approval, Preliminary Design can be completed and Class 3 estimate achieved prior to construction beginning.

Standard corporate and departmental administrative charges have not been applied to this major capital project.

Operating costs reflect the estimated incremental amounts for the new garage including utilities, building maintenance, and salaries. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Future operating budget impacts, following project completion, may need to be adjusted.

This program will support the Winnipeg Transit Master Plan complete redesign of the transit network city-wide. In the proposed new transit network, several new routes will require; dedicated bus loops, stations, mobility hubs, comfort stations for bus operators, new traffic signals where buses/ riders will be turning onto or crossing major arterial streets. This project also includes public engagement, communications, and marketing to ensure Winnipeg Transit customers and the broader public are aware and can provide input on the proposed changes and their impacts. This project also funds installation and removal of bus stop signs and other similar elements required to transition the city-wide transit network.

This program also includes \$2.4 million towards phase two of the Northwest Hydro Corridor Active Transportation Project which will complete the design and construction of a continuous 4.5 meter wide multi-use path within the Hydro corridor that parallels McPhillips Street to the west, extending between Selkirk Avenue and Templeton Avenue.

Includes 1 temporary capital funded full-time equivalent (FTE) Project Manager position.

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program (ICIP) funding. The delivery of this project is contingent on this project being approved and the Federal and Provincial funding sources being confirmed.

Future operating budget impacts, following project completion, may need to be adjusted.

This program will support the retro fit of wheelchair securements on existing buses purchased before 2021.

Beginning in 2021 all new buses received will be equipped with wheelchair securements that will meet the Accessibility for Manitobans Act (AMA) regulations. The AMA is proposed provincial legislation which mandates accessibility regulations that are not elective and must be met. The transportation regulations themselves are currently in development, and are expected to be issued soon.

This retrofit project, in addition to making the ride safer for all passengers including the most vulnerable, would allow customers to use both Winnipeg Transit Plus and conventional transit together to complete a trip. This approach is expected to provide more independence and flexibility for customers.

Includes 3 temporary capital funded full-time equivalent (FTE) positions including 1 Bus Exterior Repairer, 1 General Helper, and 1 Mechanic.

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program (ICIP) funding. The delivery of this project is contingent on this project being approved and the Federal and Provincial funding sources being confirmed.

Future operating budget impacts, following project completion, may need to be adjusted.

This project will facilitate the transition of between 22% and 30% of the Transit Plus service currently provided by contractors to being provided by in-house resources and includes, but is not limited to, the purchase of vehicles and outfitting, software system changes/licences, plant and equipment tooling and other set up and transition costs. This capital budget does not include funding for the provision of long-term storage for the vehicles.

On December 15, 2021, Council authorized a first charge of up to \$9.25 million in 2022 or prior to the adoption of the 2023 capital budget.

Includes 2 temporary capital funded full-time equivalent (FTE) positions including 1 Systems Analyst and 1 Project Manager.

As the transition date and implementation plan are as yet unknown, the operating costs are estimates only. Future capital and operating budget impacts may need to be adjusted. The operating costs have not yet been reviewed by Council and are subject to change during future budget processes.

The Shoal Lake Aqueduct, which has been in continuous service since 1919, delivers water to Winnipeg from Shoal Lake, a distance of 156 kilometers (97 miles).

Funds are for condition assessment and rehabilitation work identified through on-going monitoring and inspection programs. Work identified to date includes rehabilitation of the aqueduct pipe, berm, and underdrain system, rehabilitation of the drainage siphons crossing under the aqueduct, and the rehabilitation/replacement of select boathouses, overflow structures, bar screens, stop logs, vent pipes, manholes, culverts, ditches, bridging structures and railway crossings signals.

The expected life of this asset is 40 years.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The Shoal Lake Aqueduct, which has been in continuous service since 1919, is the sole water supply infrastructure for the City. The Shoal Lake Intake Structure is the transition headworks to receive water from Shoal Lake and to control the water flow into the aqueduct. Given the critical nature of the intake structure and its associated venturi structure to the safe operation of the aqueduct and the City's water supply, a condition assessment was undertaken and identified a number of rehabilitation and replacement requirements. This included the replacement and refurbishment of various mechanical components that date back to the original construction, upgrades to the mussel control system, as well as upgrades and improvements to the existing infrastructure. The recommended improvements will be completed in phases according to priority.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The Branch I and II Aqueducts, along with the Branch Interconnection Aqueduct are specialized pipes which are unique in size, materials, construction techniques and failure modes. The Branch I Aqueduct was installed between 1914 to 1918 and the Branch II and Interconnection Aqueducts were installed between 1959 and 1963. All of these require specialized inspection, testing, and maintenance to preserve the asset.

Funds are for the condition assessment and rehabilitation of the Branch and Interconnection Aqueducts along with their associated ancillaries.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

The expected life of this asset is 40 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The Tache Booster Pumping Station, on the Branch 1 Aqueduct, was constructed in 1950 in order to develop the full capacity of the aqueduct. A study identified a number of required upgrades to the pumping station and the aqueduct surge tower adjacent to the station. The work includes upgrading the station's electrical, heating and ventilation systems, upgrading the foundation and roof structures, and upgrading and reconfiguring the valve and piping system between the pumping station and the surge tower. Also, aesthetic, security fencing, and landscaping upgrades to the site and facilities will be undertaken to integrate with the proposed residential redevelopment of the surrounding area.

Preliminary design work will provide a class 3 estimate prior to construction.

The expected life of the rehabilitated asset is 50 years.

The Drinking Water Quality Strategy Project has determined that chlorination at the existing pumping stations should continue in order to maintain a chlorine residual in the distribution system. The existing chlorination system uses chlorine gas, which is a hazardous chemical.

Funds are for the design and installation of a new chlorine system or for the existing system to be upgraded in order to reduce risks.

Preliminary design work will provide a class 3 estimate prior to construction.

Operating costs are for additional monthly maintenance inspections and increased natural gas and electricity for ventilation of chlorine environments when occupied. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

The expected life of these assets is 25 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The Deacon Reservoir is used to supplement the City's water supply when the daily demand exceeds the capacity of the Shoal Lake Aqueduct and to provide water during Shoal Lake Aqueduct shutdowns. A topographic survey of the top of the reservoir dikes found some top of dike elevations that were substantially lower than design elevations. Geotechnical testing was completed and found that the dike fill remains well compacted and consolidation of the soils below the dikes is ongoing but is slowing over time. Based on existing water demands and the operational strategy of the reservoir, consolidation will continue to be monitored through dike surveys and any dike raises will be deferred until water demands increase.

Preliminary design work will provide a class 3 estimate prior to construction.

The expected life of this asset is 50 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The in-town pumping stations supply 100% of the City's daily water use. Accurate flow measurement of water leaving the pumping stations is critical to the operation of the water distribution system. Due to age and lack of hardware support, the accuracy of the existing meters is not within an acceptable range.

Funds are to replace the meters and provide a means of secondary measurement.

The estimated life of this asset is 25 years.

Programmable Logic Controllers (PLCs) are specialized hardware with customized software that provide local control of systems and processes at the Winnipeg Drinking Water Treatment Plant. The PLCs currently in use at the Winnipeg Drinking Water Treatment Plant have reached industry standard for replacement and are in the process of being discontinued by their manufacturer. To ensure a continuous supply of water to the City of Winnipeg, the PLCs will need to be replaced. Communication hardware associated with the PLCs is nearing end of life and will need to be replaced.

Preliminary design work will provide a class 3 estimate prior to construction.

The expected service life of the PLCs is 10 years but will depend on technical advancement in the process automation field.

The electrical power supply is the primary source of energy to drive the pumps in the drinking water pump stations. Electrical power disruptions have caused the electric pumps to shut down for protection purposes, which results in reduced water service. In order to identify the deficiencies in the system, a Water Pumping Station Power Reliability Study was completed. One of the recommendations of the study was to carry out water pumping stations electrical inspections. The study and the inspections produced recommendations for a number of electrical and control improvements to reduce the effects of electrical power disruptions.

The required improvements will be completed in phases according to priority. The Water Pumping Station Power Reliability Study also recommended a number of upgrades to address risks associated with the configuration of the pumping and ancillary equipment. These reliability upgrades will address shortcomings in the existing control and instrumentation design and will add redundancy to ensure greater station reliability. These reliability upgrades will be undertaken in conjunction with the Supervisory Control and Data Acquisition upgrade project to minimize station shut-down times.

Power quality benchmark testing has found that the electric motors used to distribute potable water from the McPhillips Regional Pumping Station are causing an unacceptable temporary voltage drop upon motor start-up. Preliminary design will be undertaken to determine the options available to limit voltage drop and may identify power quality upgrade requirements at other water pumping stations.

The estimated life of this asset is 60 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The MacLean and McPhillips pumping stations are driven using two sources of energy: electrical power supply and natural gas. The Hurst Pumping Station, serving the largest portion of the City's water demand, is equipped solely with electrically driven pumps. Despite some redundancy in the electrical supply to the station, Hurst has experienced electrical power disruptions that caused the electric pumps to shut down for protection purposes, which resulted in reduced water service.

In light of electrical interruptions at Hurst Pumping Station, the Regional Water Supply Conceptual Planning Study Update recommended assessing the need for backup power supply to this station. This study will evaluate options for backup power supply and provide cost estimates for options.

The estimated life of this asset is 50 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The City's Regional Water Distribution System consists of three regional pumping stations (MacLean, McPhillips, and Hurst) and two booster pumping stations (Deacon Booster Pumping Station and Tache Booster Pumping Station). These pumping stations are critical infrastructure for the City and failure of any of the systems at these facilities has the potential to disrupt the City's residential, commercial, industrial, and fire protection water supplies.

The MacLean, McPhillips, Hurst, and Deacon Booster pumping stations require cooling upgrades to ensure continued operation.

The estimated life of this asset is 20 years.

The water treatment plant provides treated drinking water to the City of Winnipeg. The continued upkeep and maintenance of the water treatment plant's assets is required to ensure a continuous supply of water. An asset refurbishment and replacement plan has been developed to address asset lifecycle issues at the water treatment plant as they arise.

Condition assessment of the water treatment plant assets is ongoing and the asset refurbishment and replacement program will address items as they are identified and prioritized.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Feeder mains are specialized pipes which are unique in size, materials, construction techniques, and failure modes. The majority of feeder mains were installed in the 1960s and require inspection, testing, and maintenance to preserve the asset. The program will also include replacement of valves and operators, related pipe connections, valve chambers, structural assessments, and restoration works.

Additional investments in Feeder Main Condition Assessment and Rehabilitation will be put forward as a result of recent and ongoing condition assessment.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

This project includes the detailed design and construction of a water feeder main extension, a new sewer lift station, and force main connection to the Inkster Interceptor, as well as land acquisition and administrative costs.

Work will be separated into phases to provide servicing for the area as development occurs. Included in this project is a temporary Full Time Equivalent Senior Project Manager position for the duration of the project. The position will be funded through capital, 75% from the Sewage Disposal System Fund, 25% from the Waterworks System Fund.

\$5 million in expenditures, plus \$15 million funded by the Sewage Disposal System Fund, is to be conditional on funding of an additional \$20 million from each of the Federal and Provincial governments for the combined water and sewer infrastructure for Phase 1A work.

Operating costs include general inspections, equipment removal and overhaul, minor repairs to electrical/process mechanical/mechanical/structural. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Funding for this project is split 25% to Waterworks System Fund and 75% to Sewage Disposal System Fund.

The expected life of these assets are 75 years.

As infill development and densification occurs in Winnipeg, it puts increased pressure on existing underground infrastructure such as sewer collection, land drainage, and water distribution systems. To strategically guide areas for infill and new communities, the City needs to evaluate the existing water, sewer, and land drainage systems, as required, to identify areas which may be at or nearing capacity.

The first phase of funding will begin this process by undertaking a scoping study to determine how the City can most cost-effectively provide capacity information for development of different areas. A municipal market scan will benchmark how other cities undertake this work and develop options, cost estimates and implementation timelines that can be piloted.

This project will support the Strategic Infrastructure Plan for the City with the goal of providing sustainable social and economic development.

The development of the Plan will be implemented in phases:

Phase 1 will involve mapping of existing underground water and sewer capacity. Funding for this phase has been included for \$3.0 million to be funded by Water and Waste retained earnings. Council has directed the department to come back with the cost and schedule. Phase 2 will identify water and sewer capacity needed to promote infill and accommodate new communities.

Future phases will identify trade and commerce enabling infrastructure including:

- a. Road and bridge requirements, including mobility like trucking routes and the movement of goods within the City in accordance with the Transportation Master Plan;
- b. Information technology infrastructure to promote new investment; and
- c. Infrastructure needed for effective emergency services.

Preliminary scoping will develop a class 3 estimate prior to tender.

Additional funds may be required in future years to implement the recommendations of this study.

The majority of the City's inventory of water meters are at end of life. Funding in previous years will be used to review current water meter technology, validate the best replacement technology, and develop a plan and class 3 estimate for implementation of a multi-year direct-read water meter replacement program.

Implementation of the water meter renewal program is forecast to be funded by the Water Meter Renewal Reserve fund starting in 2025. On January 30, 2020, Council authorized the establishment of the Water Meter Renewal Reserve. The reserve will accumulate funds for replacement and renewal of aging water meters and an advanced meter system.

The estimated life of a water meter is 15 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

This is a continuing program to replace and/or rehabilitate deteriorating water main infrastructure. Funding is used for water main replacement, cathodic protection, valve and hydrant replacement/rehabilitation, correction of dead end mains, upgrading of substandard mains, water system studies, assessments, development of design standards and replacement of problem water services within the City right-of-way, and hydraulic improvements for fire protection purposes. Funding is also used for integrated right-of-way renewal programs coordinated with the Public Works Department.

The expected remaining life of each rehabilitated water main ranges from 20 to 80 years, depending on the rehabilitation technology and the asset condition.

Funds will also be utilized to manage the water infrastructure asset register, and ongoing operating costs associated with software licensing and maintenance have been included.

Operating costs are for annual license renewals for InfoAsset System. These have not yet been reviewed by Council and are subject to change during future budget processes.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Customer Care and Billing (CCB) is used to manage customer accounts and collections for Water, Wastewater and Solid Waste services. Oracle Work Order and Asset Management (WAM) is used in the delivery of Water and Wastewater services for work planning, management, infrastructure preventative maintenance and renewal programs. Both CCB and WAM require ongoing product updates to ensure these systems can support the day-to-day operations within the Water and Waste Department.

This program will maintain the CCB and WAM systems to meet current and future business requirements resulting from functional, technical, and business continuity changes.

The estimated life of this asset is 10 years.

Funding for this program is split between the Waterworks System Fund and the Sewage Disposal Fund.

*N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The former sludge drying beds in West St. Paul are no longer being used for storage. Decommissioning the sludge drying beds is a condition of closing the Environment Act Licence 1089 E RR. This work will develop a class 3 estimate for a decommissioning plan and identify options for future use.

Additional funds will be required in future years to implement the recommendations of this plan.

The Water and Waste Department's three sewage treatment plants utilize a Distributed Control System (DCS) with a Process Control View (PCV) Human Machine Interface (HMI) for process control. It is an intricate network of specialized computers that monitor thousands of sensors throughout the plants and controls the treatment processes by making calculations and adjustments prescribed by operators and process control analysts.

An Automation Master Plan was developed for the sewage treatment plants in 2012. The DCS system will be replaced with a Programmable Logic Controller (PLC) based system and a new HMI system will be installed at all three treatment plants. The replacement of the DCS and HMI systems at the North End and South End Sewage Treatment Plants are part of the major capital upgrade projects at these facilities.

This program will develop a plan to ensure operational reliability throughout the upgrades and in the long term once the upgrades are complete. The major components of this program include: maintaining the DCS and HMI systems until replacement, upgrading the inter-plant communication systems and network security components, and replacement of the West End Sewage Treatment Plant DCS and HMI systems.

The class estimate will be refined to a class 3 prior to undertaking upgrades.

The expected life of the new PLC system is 20 years and the new HMI system is 10 years.

Class Estimate: Not applicable, as this is a scalable program

A risk and criticality review of the City's three sewage treatment plants has been undertaken to assess the condition of assets and to develop a refurbishment and replacement plan for the next 25 years. The improvements identified will address process reliability, mechanical, electrical, structural components, building envelope, and safety at all three locations including any related works required such as environmental studies/assessments or decommissioning of assets. Operational efficiency improvements will also be identified and implemented in a coordinated fashion with the enhanced maintenance program.

Asset assessment and plan development are ongoing, which will continue to address items as identified. Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

The expected life of the structure upgrades is 50 years and the expected life of the electrical and mechanical components is 25 years.

As part of the Canadian Standards Association Occupational Health and Safety program, a standard entitled CSA Z462, Workplace Electrical Safety Standard has been adopted within the new Canadian Electrical Code.

The program will implement the recommendations from the Arc Flash Study on a priority/risk basis in conjunction with other electrical upgrades at the Department's facilities. This work includes decreasing the potential arc flash energy at various distribution points, upgrading equipment to lower fault energies, procuring personal protective equipment, and providing training. This is for compliance to the arc flash requirements in the electrical code.

The expected life of this asset is 50 years.

This project is for the condition assessment, rehabilitation and/or replacement of the sewer river crossings, and for the installation of leak detection equipment on the existing waterway crossings.

The department has completed a risk assessment of all river crossings in order to determine a prioritization plan for ongoing condition assessment as well as to upgrade and replace any at-risk crossings as required by Environment Licences issued by the Province of Manitoba for the wastewater collection system in the City of Winnipeg.

These funds will also be used to install continuous leak detection monitoring equipment at river crossings as required by the Provincial Environmental Licence.

A class 3 estimate will be obtained prior to construction or inspection work.

*N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: Not applicable, as this is a scalable program

The Combined Sewer Overflow (CSO) and Basement Flood Management Strategy projects will be driven by the CSO Master Plan, which was approved by the Province on November 13, 2019, developed to meet the requirements of Environment Act Licence No. 3042. The objectives of this multi-year program are to comply with the regulations to mitigate the impact of CSO's on the local water courses and improve basement flooding protection.

Funds budgeted are for the development and implementation of a CSO Master Plan as well as for sewer relief works associated with basement flooding and CSO mitigation including sewers, chambers, weirs, and other related works. Funds are also budgeted for monitoring and reporting programs and systems, pilot studies, land acquisition, and integration with other major sewer programs.

Funding has been increased based on Council Notice of Motion (referred to the 2022 budget process) dated April 29, 2021, for an increase of 50% to the Combined Sewer Overflow budget to expedite the Armstrong Combined Sewer Overflow district work.

All projects will be updated to a class 3 estimate through preliminary and detailed design prior to any construction work.

The expected life of the sewers is 50 years, mechanical components is 25 years and Supervisory Control and Data Acquisition system is 10 years.

Currently, all sewage from the land in Winnipeg south of Bishop Grandin Boulevard and west of the Red River plus the communities of Lindenwoods and Whyte Ridge flow to the South End Sewage Treatment Plant (SEWPCC). This flow crosses the Red River between the Fort Garry bridges; at this location the D'Arcy lift station raises the sewage to a sufficient height to allow it to flow by gravity under the Red River.

This crossing represents a single point of failure. If there is a failure of the lift station or the siphon, there is a substantial risk of basement flooding and/or overflows to the Red River. System redundancy is required to convey flows to the treatment plant in the event of a failure of either D'Arcy lift station or the associated siphons. Also, due to the high wet weather flows experienced at the D'Arcy lift station, the additional system capacity will reduce the risk of basement flooding and overflows to the river.

The Southwest Interceptor will provide an additional gravity crossing of the Red River. A conceptual study will be undertaken to review options and sizing. The project will be broken up into two phases; the total cost of the project is estimated at \$95 million.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Southwest Interceptor (continued):

The major benefits of constructing this project include enabling growth in south-west Winnipeg and maintaining essential level of service.

Significant risks associated with constructing this project include unknown ground conditions and construction of a river crossing.

Significant risks of not constructing the project or deferring the project include inability to accommodate future growth and inability to maintain essential level of service.

Funding in 2022 includes \$350,000 rebudgeted from capital budget authorized in 2019 - see Appendix 4.

The expected life of this asset is 75 years.

Environmental Standards Division operates a Canadian Association for Laboratory Accreditation (CALA) accredited laboratory for testing, monitoring, and compliance reporting on behalf of the Water and Waste Department. To ensure the laboratory can continue to stay up-to-date with CALA accreditation standards, meet future regulatory monitoring and reporting requirements, and accommodate the increasing demands of the laboratory's internal clients, a new facility plan is required. The plan will also investigate options to bring additional testing in-house with further accreditation requirements.

Additional funds will be required in future years to implement the recommendations of this plan.

The Supervisory Control and Data Acquisition System (SCADA) provides operational information for the City's sewer collection system (pumps, valves, gates etc.). This work will upgrade the system to new technology so that it can provide real-time information for sewer system operation and monitoring.

Operating costs are for wireless service communications provider monthly fees. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

The expected life of this asset is 15 years.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

This project includes the detailed design and construction of a water feeder main extension, a new sewer lift station and force main connection to the Inkster Interceptor, as well as land acquisition and administrative costs.

Work will be separated into phases to provide servicing for the area as development occurs. Included in this project is a temporary Full Time Equivalent Senior Project Manager position for the duration of the project. The position will be funded through capital, 75% from the Sewage Disposal System Fund, 25% from the Waterworks System Fund.

\$15 million in expenditures, plus \$5 million funded by the Waterworks System Fund, is to be conditional on funding of an additional \$20 million from each of the Federal and Provincial governments for the combined water and sewer infrastructure for Phase 1A work.

Operating costs include general inspections, equipment removal and overhaul, minor repairs to electrical/process mechanical/mechanical/structural. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Funding for this project is split 25% to Waterworks System Fund and 75% to Sewage Disposal System Fund.

Funding in 2022 includes \$1,000,000 rebudgeted from capital budget authorized in 2018 - see Appendix 4.

The expected life of these assets are 75 years.

Class Estimate: Not applicable, as this is a scalable program

This is a program to replace and/or rehabilitate combined, wastewater, and land drainage sewer infrastructure that are no longer meeting level of service objectives. A portion of the funding will be used for condition assessment of sewer assets; sewers will be replaced or rehabilitated using appropriate technologies on a risk-based level of service basis. Funds will also be utilized to update the sewer asset register, and ongoing operating costs associated with software licensing and maintenance have been included.

Funding will also be utilized for the assessment, repair and/or replacement, under certain conditions, of private wastewater sewer services within the public right-of-way under the Sewer By-Law, and for the development of wastewater and land drainage design standards.

The expected remaining life of each rehabilitated sewer ranges from 20 to 100 years, depending on the rehabilitation technology and the asset condition. The expected life of the asset register is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Customer Care and Billing (CCB) is used to manage customer accounts and collections for Water, Wastewater, and Solid Waste services. Oracle Work Order and Asset Management (WAM) is used in the delivery of Water and Wastewater services for work planning, management, infrastructure preventative maintenance and renewal programs. Both CCB and WAM require ongoing product updates to ensure these systems can support the day-to-day operations within the Water and Waste Department.

This program will maintain the CCB and WAM systems to meet current and future business requirements resulting from functional, technical, and business continuity changes.

The estimated life of this asset is 10 years.

Funding for this program is split between the Waterworks System Fund and the Sewage Disposal Fund.

*N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Solid waste must be disposed of in engineered landfill cells under the conditions of the Environment Act Licence No. 3081 R. As the capacity of existing landfill cells is consumed, new cells and their supporting infrastructure must be designed and constructed. The funding identified provides for design, excavation, liners, leachate collection, associated surface and ground water management, access roads, and associated engineering work.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Landfill gas from the Brady Road Resource Management Facility is currently captured and flared as required by the Climate Change and Emissions Reductions Act. Landfill gas is comprised of approximately 50% methane and represents a significant potential energy source that could be harnessed. Landfill gas to energy systems, capturing heat and/or power, are common in landfills throughout North America.

Funds provisioned are for engineering and detailed design. Funding opportunities with external third parties are currently being explored for full implementation.

Cost estimate for this project will be revised to class 3 through preliminary engineering prior to construction.

The estimated life of this asset is 40 years.

The Closed Landfill Site Improvement program was initiated in 2016 as a response to the Landfill Disposition Study that prioritized projects to improve and upgrade closed landfill components, including the protective cap, leachate and landfill gas collection systems, and monitoring equipment.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

Class Estimate: Not applicable, as this is a scalable program

This is a program for all-season fabrication of soil to supplement city topsoil requirements. The soil fabrication process uses city residuals, such as biosolids, street sweepings from winter road operations (sand and grit), and woodchips to fabricate top soil. This is then spread and seeded with native prairie species at city landfills. Operations include ongoing environmental and vegetative monitoring.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

There is an obligation under the Province of Manitoba Environment Act Licence No. 3081 R for the Brady Road Resource Management Facility (BRRMF) to control odours leaving the landfill site. If the gas is not collected, objectionable odours will be experienced by the nearby neighbourhoods from the active filling area. Additionally, flammable gases will be released uncontrolled from the decomposing waste which may pose public health and safety risks. The Climate Change and Emissions Reductions Act requires the City to collect and destroy methane gas generated by the BRRMF, consistent with Provincial directives on greenhouse gas reduction and odour control.

The estimated life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Authorization (\$000's)						
Detailed Design & Construction	770					610

This work is a requirement of the Province of Manitoba Environment Act Licence No. 3081 R.

Licensing requirements identify the need for mud and dust control as part of the standard operating procedures for landfill operations. With the increased traffic expected due to the use of a new area of the landfill, current maintenance methods would not be adequate to maintain compliance.

Improvements to internal roadways will be made to primary roadways within the Brady Road Resource Management Facility. These improvements will ensure ongoing compliance and enhance and facilitate response time, in case of emergency. Funds provisioned are for both existing and future roadways at the landfill.

Operating savings are from reductions in yearly maintenance and dust control, and crack sealing costs. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Cost estimate for this project will be revised to class 3 through preliminary engineering prior to construction.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

Project Name: **Comprehensive Integrated Waste Management Strategy (CIWMS) - Review**

Standing Policy Committee: Water and Waste, Riverbank Management and the Environment

Class Estimate: 4

On October 19, 2011, Council adopted the Comprehensive Integrated Waste Management Strategy for implementation starting in 2012. The strategy includes a recommendation for Solid Waste Services to undertake a review, analysis and development of a roadmap of the City's solid waste systems every five years. The next review will take place in 2023.

The scope of this project will address Solid Waste business needs through the design, development and implementation of technology solutions through the introduction of new systems and/or enhancement of existing Collections Management systems. Examples include integrating City systems with contractor systems, and developing tools to generate compliance, operational and financial reports and dashboards.

Funding in 2022 includes \$500,000 rebudgeted from capital budget authorized in 2018 - see Appendix 4.

The expected life of this asset is 10 years.

WATER AND WASTE - LAND DRAINAGE UTILITY FUND

Class Estimate: Not applicable, as this is a scalable program

A 2007 report on the adequacy and operation of the City's regional flood pumping stations identified station upgrades required in the near and long term. These upgrades improve overall station reliability during high river levels and rainfall events and may include changes to ventilation, electrical, mechanical, structural, or architectural components of the stations and associated structures, chambers, weirs, outfall pipes, and gates. A program to address high priority reliability items has been developed for implementation. All stations will be upgraded for remote monitoring which is critical during flood and rainfall events.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

There are over 100 stormwater retention basins (SRBs) that the City maintains as part of the land drainage system. This program is utilized to replace aging and deteriorated infrastructure along the public shorelines and infrastructure associated with the SRBs of the City's lake system. Funding will also be utilized for the development of design standards for Naturalized SRBs.

Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

The estimated life the assets range from 15 to 50 years, depending on asset type, condition, and rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - LAND DRAINAGE UTILITY FUND

An Outfall Condition Assessment was completed in 2019. This assessment prioritizes Winnipeg's outfall sites that require renewal/rehabilitation, identifies potential renewal/rehabilitation techniques for each outfall, and provides high level cost estimates for this work. The City will program and undertake risk-based work on a yearly basis to maximize use of funding for the rehabilitation of sewer outfalls, repairs to piping and related appurtenances, and to improve riverbank stability issues. Funds are also included for condition assessments and re-inspections, as required.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

All land drainage gate chambers have been upgraded to a protection level of 24.5 ft James Avenue. The current focus of this program is to upgrade existing gate chambers to meet minimum levels of service and install new gate chambers for flood control on both combined and separated sewer districts during high river level conditions. Under high river level (flood) conditions, the river water backs up into the land drainage and combined sewer systems. An engineering study has been undertaken to develop conceptual designs and cost estimates for adding flap gates and permanent pumping as required for some of the identified sites, and will be undertaken for remaining sites in future years.

Funds are also provisioned for the rehabilitation of sewer flap gates and associated structures to ensure that all systems are adequately protected from river water intrusion.

Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

This project will investigate and implement programs, policies and legislation to:

- 1) Protect and ensure permanency of current and future secondary dike installation;
- 2) Prevent construction of new structures interfering with secondary dikes and within unprotected areas subjected to frequent high river levels;
- 3) Purchase, remove and relocate existing structures from the floodplain; and
- 4) Investigate a process and develop guidelines to control or prevent improvements/re-developments at unprotected private properties with potential acquisition of such high risk properties starting in 2007.

In April 2007, Council approved a program to raise the level of flood protection for low-lying properties below 20 ft James Avenue where it could be demonstrated the cost of providing sandbags exceeded the cost of a permanent flood works. In this program, the level of flood protection would be raised to 22.5 ft. James Avenue and thereby avoid the need to sandbag for most floods. To date 30 properties have been protected under this program and a few of the properties have had their flood protection systems raised up to the City's designated Flood Protection Level (FPL).

The program is now focusing on properties impacted in the south end of the City due to river ice conditions. It is expected that the program will be completed in the next 2 to 3 years.

The provision for development agreement payback is an allowance for the City to repay developers who bridge finance the installation of oversized underground infrastructure at the request of the City at a time when City capital funding is not provided. The policy framework for bridge financing the oversized services was defined in the Development Agreement Parameters, adopted by Council on July 17, 2002.

Development agreement paybacks will be funded by two sources:

- 1) Developer Capacity Charges: used to fund paybacks related to oversized regional land drainage services. Paybacks will be managed based on available funds in the Developer Capacity Charges account.
- 2) Transfer from Sewage Disposal System Fund: generally used to fund local underground services oversizing.

The expected life of the installed assets are over 50 years.

This program funds fleet asset acquisitions which are based on the Winnipeg Fleet Management Agency (WFMA) 2022 to 2025 fleet replacement plan, and are subject to future revision due to WFMA and City department decisions and vendor availability. Fleet acquisitions in 2022 are estimated by fleet category as follows (in thousands of dollars):

- Construction Equipment \$3,453
- Light Duty Fleet \$3,515
- Specialty Equipment \$6,163
- Heavy Duty Fleet \$2,539

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The Winnipeg Fleet Management Agency (WFMA) offers three types of fuel at below market prices - unleaded gasoline, clear diesel and marked diesel available at five fully automated 24/7 locations strategically located throughout the city. Fuel is managed using a charge-back system based on fuel consumption for each individual fleet vehicle. This program funds capital improvement expenditures to infrastructure at WFMA fuel sites.

This program supports the delivery of on-street and off-street enforcement of parking related by-laws, as well as enforcement related to the Vehicles For Hire by-law, by investing in technologies that allow for effective enforcement practices and increased compliance with by-laws. Capital funding is used to both replace automated license plate recognition (ALPR) units and purchase new inventory and necessary information technology infrastructure, such as laptops.

Planned investments for 2022 include replace/evergreen two ALPR units.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Live Downtown - Rental Development Grant Program	Planning, Property and Development	238,677	369,763	370,062	1,906,151
Total - Grants from Reserves		17,647,938	23,731,906	23,713,788	14,205,872
Total Grants		69,266,442	75,281,640	76,895,722	66,878,036

The listing of grants/payments includes grants in the operating, capital, and reserves budgets. The operating grants/payments are separated into four categories (annual, long-term agreements, other programs and value in kind). The City can enter into two-year grant agreements with grant recipients with a provision that grants for years following 2022 are subject to annual budget approval.

Notes:

1. Service Purchase Agreements, formerly Community Partnerships. See Appendix 9 Glossary for definition.
2. Long Term Agreements/Obligations, formerly Community Partnerships. See Appendix 9 Glossary for definition.
3. Grant is recorded as an offset to the Property Tax and Business Tax Revenue.
4. Grant is recorded as an offset to the Refundable Entertainment Funding Tax Revenue.
5. 2020 and 2021 budgets have been restated. The Community Centres, General Council of Winnipeg Community Centres (GCWCC), GCWCC - Athletic Field Sweat Equity, and St. Boniface Museum as they were previously included in Annual Grants - Operating Budget' and have now moved to 'Long Term Agreements - Operating Budget.
6. The recipient is unknown at this time and may not be allocated as a grant in 2022.
7. Identified as arts and culture related funding.

Total Indigenous Youth Strategy		1,125,000	1,125,000	1,375,000	1,375,000

* Infrastructure training/apprenticeship program (cash and in-kind services) – the City of Winnipeg 1/3 share of up to \$175,000 in the program is subject to 1/3 funding from the Province and 1/3 funding from the private sector.

Major Capital Projects

On October 28, 2015, Council concurred in the recommendation of the Executive Policy Committee and adopted the following:

- That an adjustment to the dollar value for the definition of a Major Capital Project for reporting to the Standing Policy Committee on Finance be approved from \$10 million to \$20 million to reflect construction inflation since Council originally adopted the policy in 1999.
- That the threshold for Major Capital Project reporting to the Standing Policy Committee on Finance be automatically revised annually for construction inflation and disclosed in the Annual Capital Budget put forward to Council for adoption.
- That the adjusted dollar value for reporting to Standing Policy Committee on Finance be applied on a prospective basis. Projects currently reporting that are under the revised threshold will continue reporting until the project is completed.

Year	Threshold (in millions)	Construction Inflation*	Revised Threshold after Inflation (in millions)
2019	\$23.4	3%	\$24.1
2020	\$24.1	3%	\$24.8
2021	\$24.8	3%	\$25.5

*Forecasted construction inflation is used to prepare the threshold for the following year.

Thus, for 2022, projects \$25 million or greater are required to form a Major Capital Projects Advisory Committee within 180 calendar days of project authorization and begin reporting financial status to the Standing Policy Committee (SPC) on Finance. Reporting is to be done on a quarterly basis, unless otherwise directed by SPC Finance, until the project is complete. The SPC Finance Committee may, at its discretion, request projects below this threshold to report to the Committee.

Listing of Major Capital Projects previously approved and active for 2022**:

- 1) North End Sewage Treatment Plant (NEWPCC) Upgrade Projects: Power Supply and Headworks Facilities
- 2) South End Sewage Treatment Plant (SEWPCC) Upgrading and Expansion
- 3) Southwest Rapid Transitway (Stage 2) / Pembina Highway Underpass
- 4) Water Supervisory Control and Data Acquisition (SCADA) Upgrade and Expansion
- 5) North District Police Station (NDPS) & Archival and Exhibit Building
- 6) South Winnipeg Recreation Campus Phase One – Recreation Centre

**This listing does not reflect projects approved by Council that are contingent on confirmation of external funding applications still pending.

City of Winnipeg Cost Estimate Classification*

Cost Estimate Class	Project Definition	Project Definition/ Design % Complete	Accuracy of Cost Estimate
Class 5	Concept Screening, Rough Order of Magnitude Estimate	~1%	-50% to +100%
Class 4	Feasibility	~10%	-30% to +60%
Class 3	Preliminary Design (for Budget Authorization)	~30%	-20% to +30%
Class 2	Detailed Design in progress	~60%	-15% to +20%
Class 1	Detailed Design Documentation Complete, Pre-Tender Estimate	~99%	-10% to +15%
Scalable	Project/Program scope can be adjusted to fit the Budget	N/A	N/A

Cost Estimate Class Descriptions

- Class 5 Rough estimate prepared based on very limited information. Used to make an assessment of initial viability and for long range capital planning.
- Class 4 Estimates prepared based on limited information with some engineering work completed and preliminary scope determination.
- Class 3** Estimates based on completed preliminary design documentation. This Class 3 estimate will form the basis for budget authorization and set initial control estimate against which project deliverables will be measured (i.e. on budget).**
- Class 2 Estimates prepared in progressive detail from a Class 3 and are used to establish a contract value against which decisions can be made to revise the scope of the project and manage risk at a specific milestone in the design development.
- Class 1 Pre-tender estimates prepared based on completed detailed design documentation (i.e. drawings, plans, specifications, etc.) as well as complete project delivery plans.
- Scalable Scalable projects/programs will be sized according to the final budget authorization.

* Determined using the AACE International, Recommended Practices 17R-97, 18R-97, 56R-08, 97R-18 & 98R-18

Public Private Partnership Payments as a Percentage of Cash to Capital / Canada Community-Building Fund

	(\$000's)

Financing Sources:							
1 Cash to Capital	\$ 5,688	\$ 3,079	\$ 2,567	\$ 20,000	\$ 20,000	\$ 20,620	\$ 20,236
2 Canada Community-Building Fund	51,631	86,751	58,357	49,940	48,420	48,432	48,432
Total Financing Sources	\$ 57,319	\$ 89,830	\$ 60,924	\$ 69,940	\$ 68,420	\$ 69,052	\$ 68,668
Payments as a Percentage of Cash to Capital and Canada Community-Building Fund	40.20%	25.76%	38.28%	33.52%	32.26%	32.13%	32.48%

Notes:

- Public Private Partnership Payments include annual service/financing payments and debt servicing payments.
- On December 15, 2009, Council directed that the annual lease/service payments and debt servicing costs for tax supported public private partnerships be funded annually up to a maximum of 30% of the cash to capital contribution and the federal gas tax (Canada Community-Building Fund).
- On December 16, 2020, Council amended the P3 Policy to: If the funding of annual lease/service payments and debt servicing costs for tax supported public private partnerships exceeds 30% of cash to capital contribution and federal gas tax (Canada Community-Building Fund), no additional tax supported public private partnerships can be entered into until funding of annual lease/service payments and debt servicing costs for tax supported public private partnerships is reduced to a level below 30% of cash to capital contribution and federal gas tax (Canada Community-Building Fund).
- The "Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass" capital project was approved by Council on June 25, 2014. As this is a Utility and Other project, it does not impact this Public Private Partnership Payments calculation.
- Effective for the 2022 Budget, Federal Gas Tax has been renamed the Canada Community-Building Fund.

Total Projects Financed by the Canada Community-Building Fund Annual Allocation		48,797	51,915	49,940	48,420	48,432	48,432

1. Effective for the 2022 Budget, Federal Gas Tax has been renamed the Canada Community-Building Fund (CCBF). Total Council approved CCBF is broken out into two components: annual allocation (details in the above table) and one-time top up (separate schedule in the next page).

2. Council approved an amendment to the Preliminary budget on December 15, 2021 for \$800,000 from the Canada Community-Building Fund to be allocated equally to spray pads for each of the Whyte Ridge Community Centre and Maples Community Centre - Adsum Park. \$491,000 of the \$800,000 in funding came from the \$44.4 million one-time top-up approved by the Federal Government in 2021 and \$309,000 was from surplus funds identified in the reserve.

Capital Projects Funded by the Canada Community-Building Fund - Top Up Allocation

	2022	2023	Total	(\$000's)			
	2024	2025	2026	2027

Corporate Finance²							
10 Economic Response and Recovery Plan: Revitalizing Downtown Strategy	9,500						
11 Economic Response and Recovery Plan: Related Infrastructure Investments	9,500						
Transit							
10 Transit Plus In House Service		6,442					
Total Projects Financed by the Canada Community-Building Fund Top Up Allocation	37,954	6,442	44,396	-	-	-	-
One-time Top Up Allocation	37,954	6,442		-	-	-	-
Annual Canada Community-Building Fund	48,797	51,915		49,940	48,420	48,432	48,432
Total Funding in 2022 Adopted Budget	86,751	58,357		49,940	48,420	48,432	48,432

1. With approval of the 2021 Federal Budget a one-time top of \$44.396 million was approved. Funding of \$44.396 million has been included in the 2022 Adopted Budget - \$37.954 million in 2022 and \$6.442 million in 2023.

2. Projects are part of the Economic Response and Recovery Plan. Specific project allocations to be approved by Council in 2022.

Active Transportation Projects 2022 - 2027

	(\$000's)					
	2022	2023	2024	2025	2026	2027
Pedestrian and Cycling Program	3,170	1,890	1,651	1,683	2,321	2,899
Regional and Local Street Renewal						
Regional Street Renewal Program	2,550	1,675				
Active Transportation	2,388					
Local Street Renewal Program	1,500	900	600	600	600	600
TOTAL	\$ 9,608	\$ 4,465	\$ 2,251	\$ 2,283	\$ 2,921	\$ 3,499

Notes:

1. The six-year Active Transportation investments total \$25.0 million.
2. On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation facilities into any reconstruction or rehabilitation required on any infrastructure identified as an Active Transportation facility in the Proposed Active Transportation Network.
3. The amounts above are the budget dollars dedicated to active transportation facilities within the adopted capital budget.
4. There may be other active transportation projects included in the 2022 Capital Budget and 2023 - 2027 Five-year Forecast that could not be estimated at time of printing.
