Subject line: Learn More About HSAs

Team –

Did you know using your Health Savings Account (HSA) is like giving yourself a discount on health, vision and dental costs? That's because you can save up to 35% or more in taxes¹ on every dollar you deposit into your HSA.

Plus, since you own the account, you can build a safety net for future expenses and even save and invest for retirement. It's like a 401(k) for health care.

→Watch a [short video](#) or view the [HSA overview](#) to learn more about the great benefits of HSAs.

-The Benefits Team

¹ Tax savings example assumes 25% federal, 3% state, and 7% payroll tax savings. Payroll tax savings are only available for deposits made through payroll. State tax savings are not available in all states. Your savings may vary.
