

Anthem HSA Advantage Direct Enrollment

The following steps outline an HSA Advantage Direct deployment.

There is no implementation required. The HSA Advantage Direct url that has been created for Anthem is ready to be used!

<https://mybenefitwallet.com/HSA/anthem.adv>

1. Anthem provides the Employer with the HSA Advantage Direct communications, which includes:
 - The HSA Advantage Direct deployment details.
 - Sample communications to employees.
2. The Employer determines how best to communicate the HSA Advantage Direct enrollment option to employees and includes that communication in benefits materials.
3. Anthem transmits HSA eligibility data to BenefitWallet™.
4. The data that was previously entered by the employee on HSA Advantage Direct is matched against the data from the Anthem enrollment file.
 - If there is a match, BenefitWallet opens HSAs and issues debit cards for HSA Advantage Direct enrollees.
 - If the data that you enter does not match the data that is provided from Anthem, you can still open your HSA. You will be mailed the standard full Welcome Kit from Anthem. You can activate your HSA via Anthem.com or by mailing in your Master Signature Card.
5. BenefitWallet mails abbreviated Welcome Kits to HSA Advantage Direct enrollees and sends full Welcome kits to other HDHP members.
