

GLOVE SIZING GUIDE

OPTION 1: MEASURE HAND

Using a string or measuring tape, measure the circumference around the knuckles, excluding the thumb. Your hand should be open with the fingers together. Compare this measurement to the chart below to determine your glove size.

5/XXS	6/XS	7/S	8/M	9/L	10/XL	11/XXL	12/3XL
5-6"	7-7.5"	7.5-8"	8-8.5"	8.5-9"	9-10"	10-11"	11-12"
12-15cm	18-19cm	19-20cm	20-21.5cm	21.5-23cm	23-25cm	25-28cm	28-30cm

OPTION 2: SIZING CHART

Place your right hand on the glove chart so that the saddle of your thumb and index finger line up with the X. The measurement closest to the right edge of your hand will be the appropriate glove size.

Industrial gloves inevitably have varied size ranges, and this is because of the materials needed to provide adequate and specific protection. We recommend using our size charts, reviewing glove descriptions and materials, and if you are still uncertain about what size would best fit your hand, give us a call at 1-616-459-4144.

BODY PROTECTION: HOW TO MEASURE

You may need to order one size larger when wearing arm guards over shirt sleeves, in which case we recommend measuring over your clothes. Having someone assist you will ensure accurate measurements.

NECK: Measure circumference where a standard button-down collar would be fastened.

BICEP: Measure around the widest part, a few inches below the shoulder.

CHEST: Measure circumference of the fullest point, keeping tape horizontal around the body.

SLEEVE LENGTH: Measure the distance from the prominent bone in the center on the back of the neck, across the shoulder, over the bent elbow, to the wristbone.

GLOVE CARE: WHY DOES IT MATTER?

Improper glove care can shorten the life of your PPE. It can also lead to dermatitis, decreased dexterity, loss of protective abilities, and odor. Glove care refers not only to laundering, but also proper storage, routine glove checks, and knowledge of materials and their particular strengths and weaknesses.

Because there are so many different work gloves on the market, experienced safety managers should be aware of what workers' gloves are made of and how they will stand up to the applications they're being used for. Common glove materials include nylon, spandex, leather, cotton, SuperFabric®, Kevlar®, and knit fibers. Each of these materials has a certain way it needs to be cared for, and oftentimes there is a blending of the materials, making proper care even more crucial.

Proper storage

Gloves should be ideally stored in clean, dry conditions, away from direct sunlight and extreme temperatures.

Routine glove checks

Glove life varies based on application, environment, and amount of use. Because of this, it is vital that you perform routine glove checks, ideally before going to work every day. Take note of areas that may have begun to wear down, such as loose Velcro®, a worn-down name tag, lingering moisture, or a strong odor. Keeping an eye out for these issues and others keeps you one step further from a worksite hand injury, which is the ultimate goal of hand protection in the first place.

Care and content

Our C&C tag, which indicates washing instructions and fiber content, is located on the inside cuff of all our gloves.

- Gloves marked "wash with care" are machine washable. The number inside the symbol denotes what temperature to wash the gloves at (e.g., machine wash with care at 30 degrees Celsius). Washing with care can be done by changing the machine cycle, using a different pre-set wash program (gentle/delicate), and being sure not to overload the washing machine.
- When washing by hand it is important to use a soap and/or detergent that won't irritate your skin. Also, be sure to wash gloves over a sink or outside, and rinse thoroughly.

Companies who properly launder their gloves can increase lifespan by up to 300%.

Laundering removes harmful chemicals, perspiration, and everyday grit and grime that can weaken protective fibers and seams. Our team of HexArmor® solutions specialists are here to help you with this process, and they are more than happy to provide you with all the information you need.
