

# Handout: Blood Vessel Flow Charts

Source: Cynthia Harley, Ph.D.

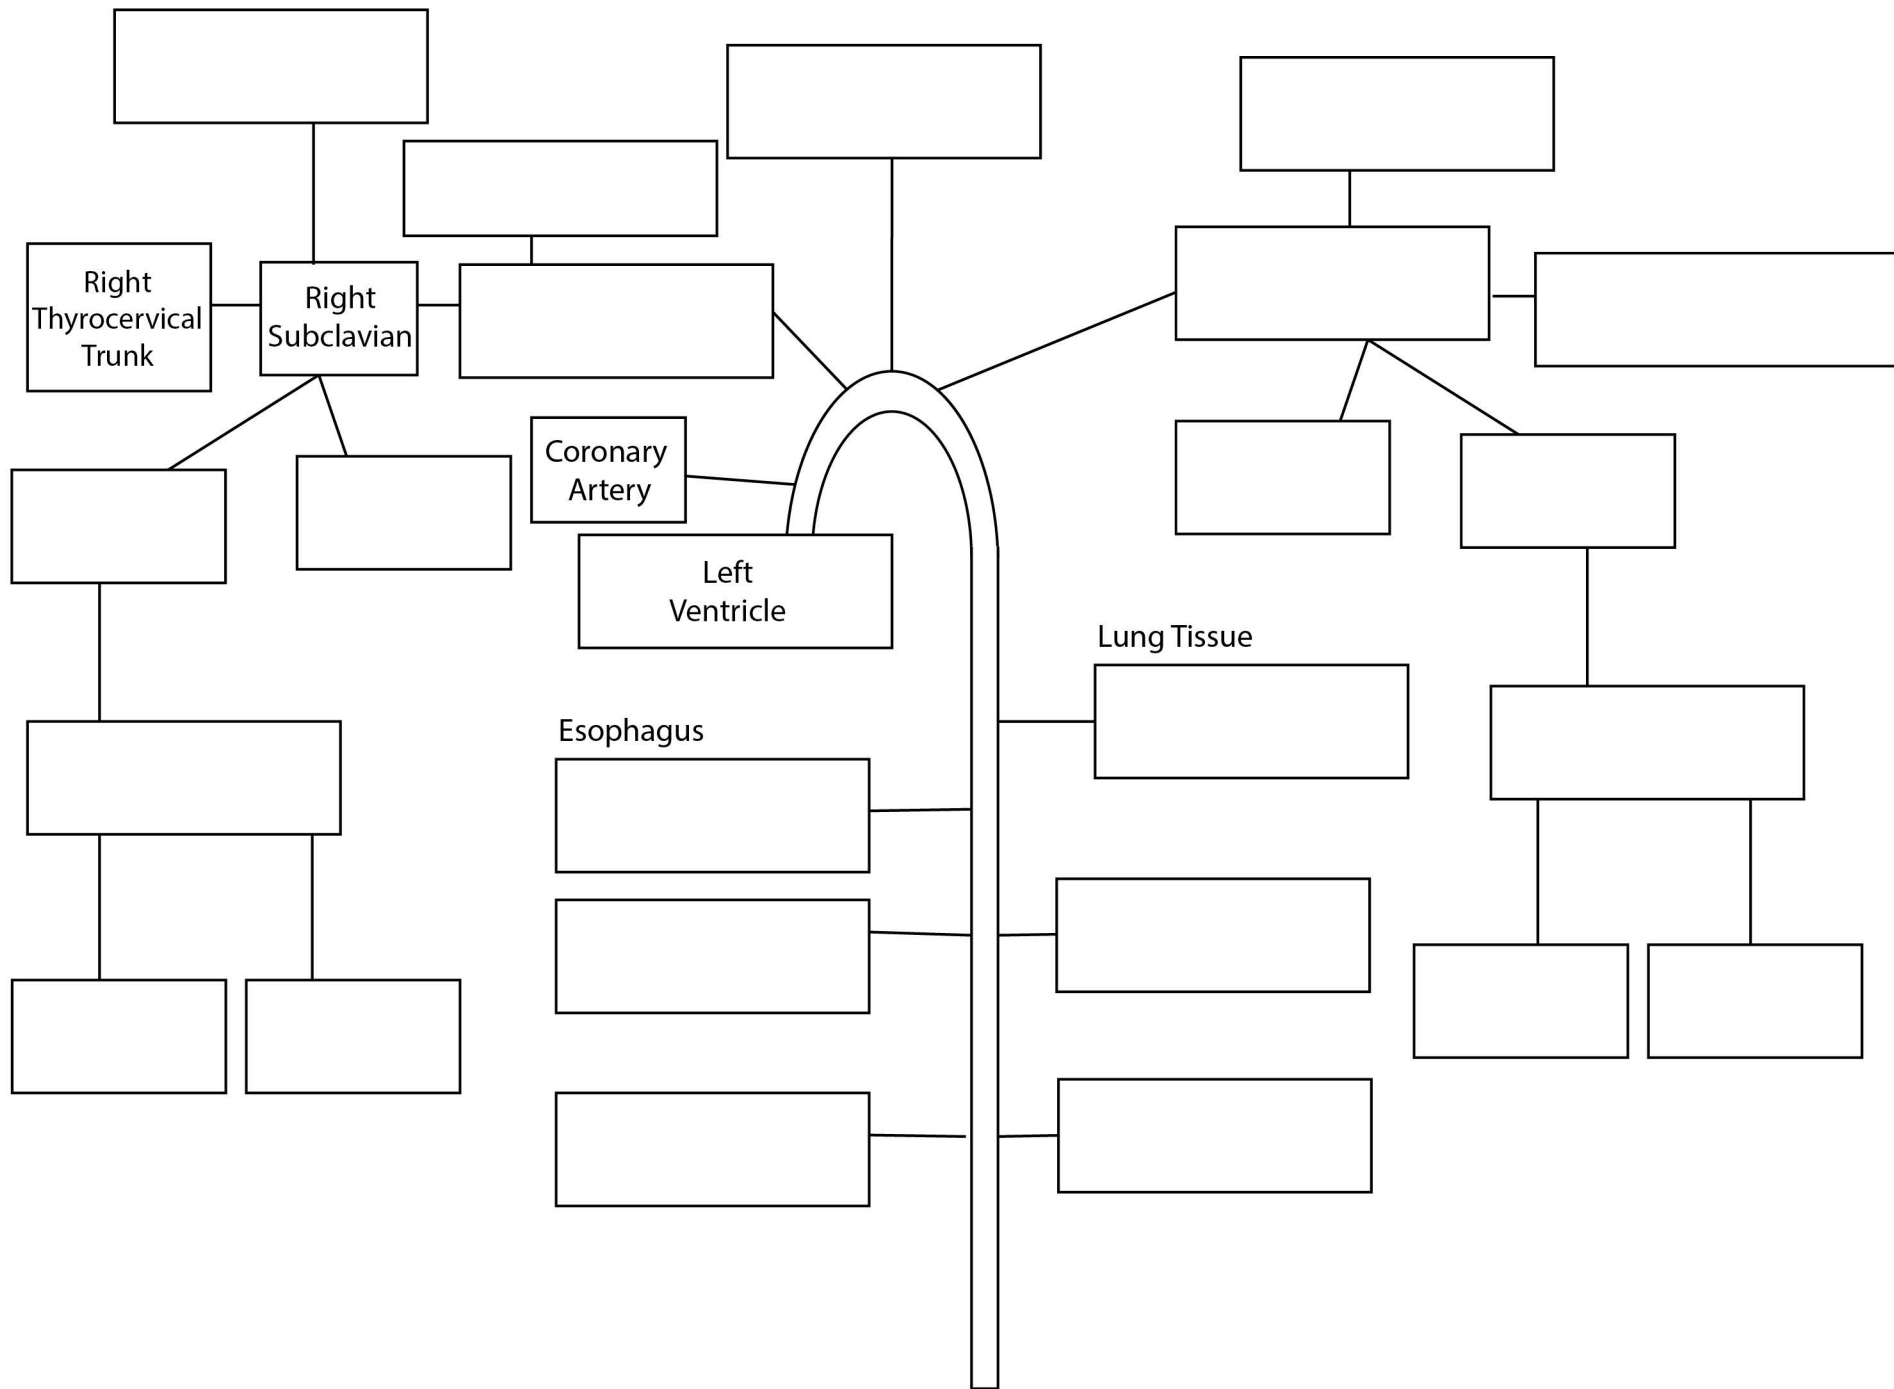

Name: \_\_\_\_\_

Complete the following flow chart by adding the names of the veins. Where possible, include the organs/areas each vein serves above or next to each box. Note that some of these veins are more medial than others; this is important for determining the naming.

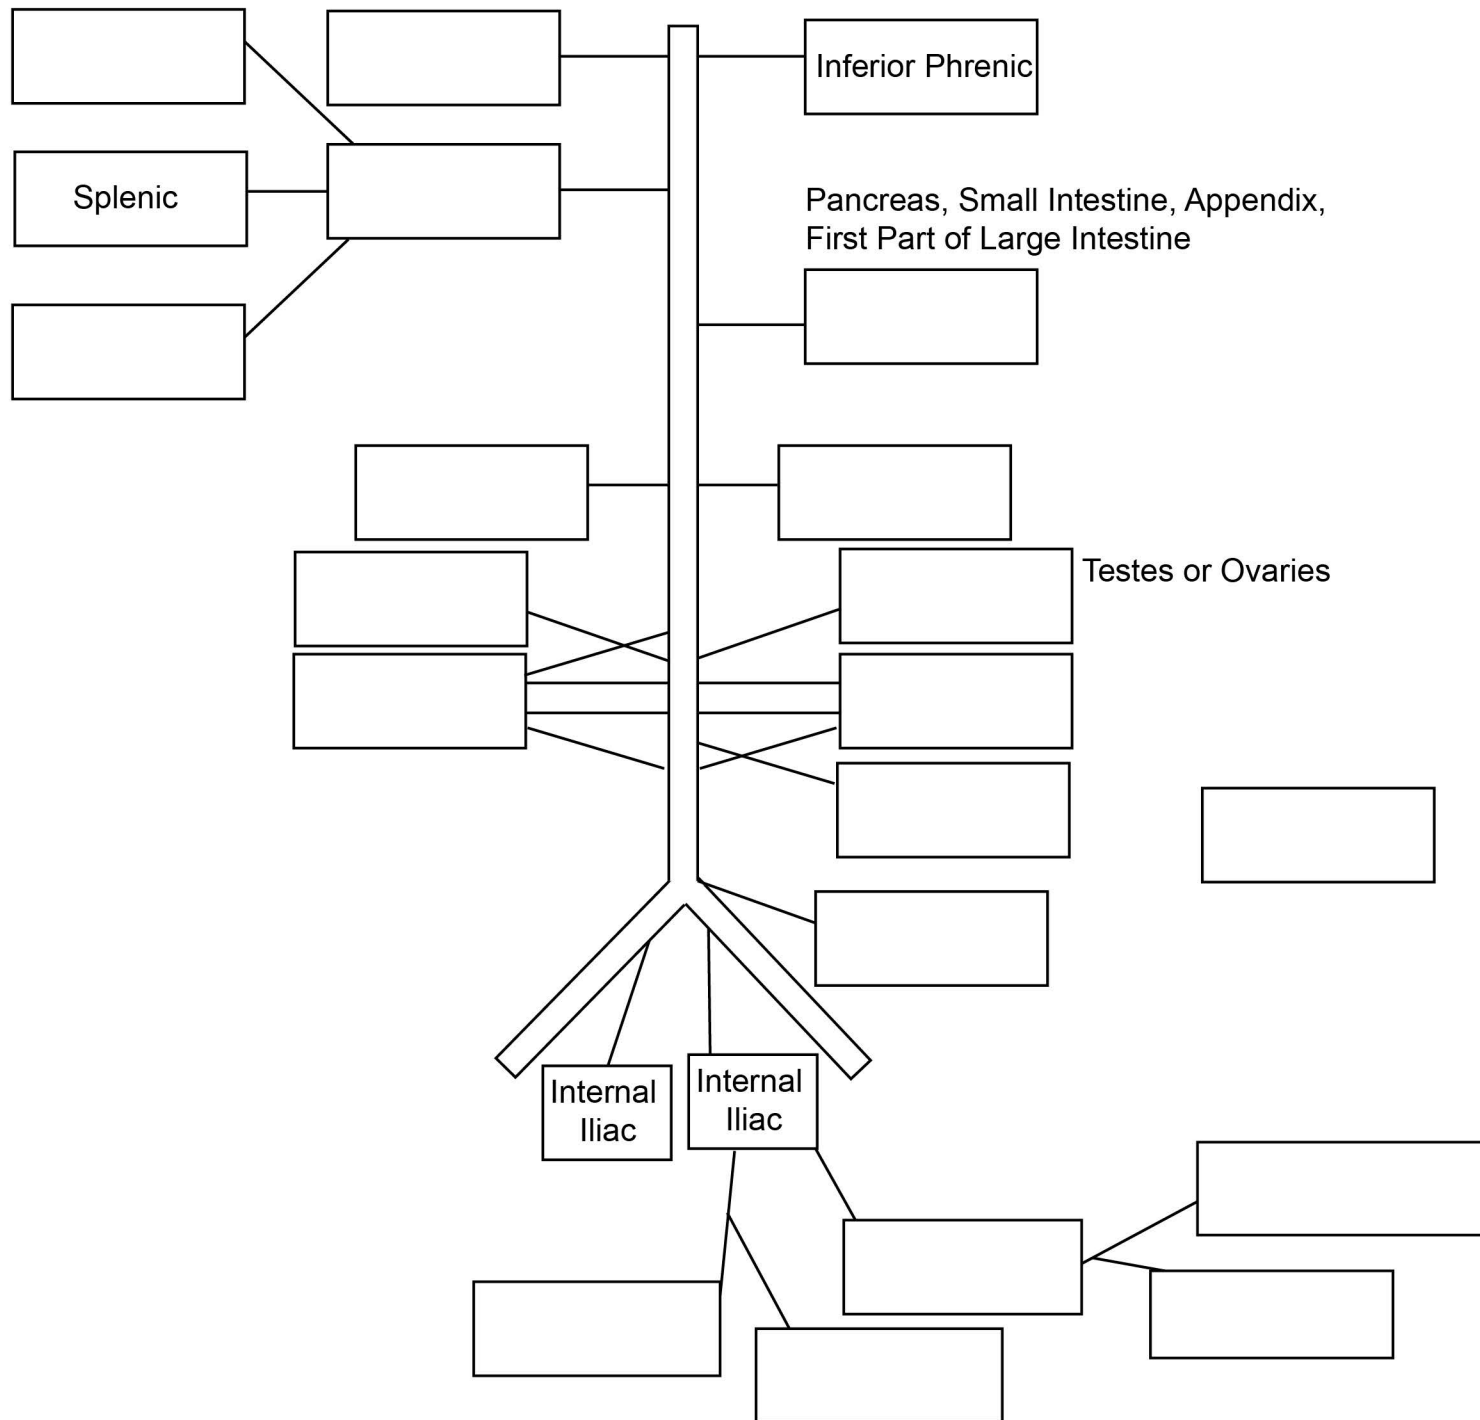

Complete the following flow chart by labeling the branches and sub-branches of the thoracic aorta.  
Where possible, include the organs/areas each branch serves above each box.

Complete the following flow chart by adding the parts of the abdominal aorta and the iliac arteries.  
Where possible, include the organs/areas each artery serves above each box.

Complete the following flow chart by adding the names of the arteries for the lower limbs.  
Where possible, include the organs/areas each artery serves above each box.
